Executive Summary

DigitalGlobe satellite imagery and in-country sources clarified reports of intentional destruction at Nineveh. Sources on the ground in Mosul and DigitalGlobe satellite imagery show that the Nergal Gate still stands, but the Mashki and Adad Gates are confirmed destroyed. ASOR CHI received photographs on April 13, 2016 from a Mosul civilian, who at great risk to his/her personal safety took pictures of earth movers leveling parts of Nineveh. The source identified the Mashki Gate and Nergal Gate as being destroyed. This source contacted ASOR CHI again on May 4, 2016 and provided an update. The Nergal Gate is intact, and provided photographic evidence as proof. All photographs were taken from a moving car as it is forbidden for civilians to take photographs and video within ISIL territory or suffer severe punishment. The source misidentified the Adad Gate as the Nergal Gate, and understandably so. DigitalGlobe satellite imagery released May 2, 2016 provides further confirmation. Both the Mashki and Adad Gates as well as large portions of the exterior city wall were all leveled. Additionally, there are multiple tunnels within the archaeological site, reaffirming in-country reports of looting. There is also evidence of a large bridge crossing the Khosr River under construction. This repeats an observed pattern of commercial and infrastructure expansion within the site boundaries of ancient Nineveh. This latest DigitalGlobe imagery also corroborates earlier reports of looting at Nineveh, with four tunnels visible in the imagery available of the northern half of the archaeological area. Furthermore, DigitalGlobe satellite imagery from May 8, 2016 shows the Palace of Sennacherib (Southwest Palace) at Nineveh has been completely dismantled, likely the result of scrap metal harvesting. This new imagery demonstrates that the economic exploitation of ancient Nineveh is becoming increasingly more severe.

Multiple aerial bombardment incidents resulted in severe damage to multiple heritage sites and repositories. Both the Al-Ma’arra Museum, where The Day After Heritage Protection Initiative (TDA HPI) and ASOR CHI just completed a mitigation plan to protect the collection and repair previous airstrike damage, and the Idlib Museum were directly hit by airstrikes. Mosques in Idlib and Deir ez-Zor Governorate were also damaged in aerial campaigns, but the city of Aleppo was the most devastated with eight mosques damaged in the city alone. This activity represents a significant escalation in bombardment campaigns by SARG and Russian forces. This reporting period has seen a sharp uptick in the level of damage inflicted on cultural heritage sites. Damage was particularly devastating in areas that had seen less fighting and destruction during the declared “cessation of hostilities”. Local sources reported a particular increase in damage inflicted to discernable civilian sites including hospitals, markets, aid and food disbursement centers, and places of worship.

---

1 This report is based on research conducted by the “Cultural Preservation Initiative: Planning for Safeguarding Heritage Sites in Syria and Iraq.” Weekly reports reflect reporting from a variety of sources and may contain unverified material. As such, they should be treated as preliminary and subject to change.
Key Points

- New photographs show damage to Abu Bakr al-Sidiq Mosque in Dumeir, Rif Dimashq Governorate (ASOR CHI Incident Report SHI 16-0045 UPDATE).
- Aerial bombardment and clashes between armed groups damaged eight mosques in Aleppo, Aleppo Governorate (ASOR CHI Incident Report SHI 16-0060).
- An alleged SARG airstrike reportedly damaged the Iman Mosque in Deir ez-Zor, Deir ez-Zor Governorate (ASOR CHI Incident Report SHI 16-0061).
- Alleged SARG airstrikes damage the Idlib Museum, Al-Jawari Mosque, and Omari Mosque in Idlib, Idlib Governorate (ASOR CHI Incident Report SHI 16-0062).
- Alleged SARG airstrikes damaged Al-Ma’araa Museum in Ma’arat al-Numan, Idlib Governorate (ASOR CHI Incident Report SHI 16-0063). The Day After Heritage Protection Initiative has produced two reports on the damage and subsequent cleanup of the museum.
- New satellite imagery confirms that ISIL militants have leveled several gates of Nineveh in Mosul, Ninawa Governorate (ASOR CHI Incident Report IHI 16-0010 UPDATE).
- New satellite imagery shows ongoing damage to the site of Nineveh, including the ongoing looting and destruction of the Southwest Palace of Sennacherib in Mosul, Ninawa Governorate (ASOR CHI Incident Report IHI 16-0013).

Heritage Timeline

April 30, 2016

The American University of Iraq, Sulaimani (AUIS) announced it will host a conference on May 10-11, 2016 titled “Conflict and Living Heritage in the Middle East: Researching the Politics of Cultural Heritage and Identities in Times of War and Displacement.”

April 29, 2016

Co.Create published an article titled “How UNESCO Is Crowdsourcing The Preservation Of World Heritage” (by Dan Solomon). The website ReclaimHistory.org (launched on April 29, 2016 by the founders of Project Mosul) creates virtual versions of artifacts which can be interacted with in virtual reality or through 3-D printing. http://www.fastcocreate.com/3059431/how-unesco-is-crowdsourcing-the-preservation-of-world-heritage

ARA News published an article titled “ISIS hiding weapons inside mosques of Iraq’s Mosul” (by Sarbaz Yousef). ISIL militants have taken to hiding weapons and other materials in Mosul mosques in order to avoid Coalition airstrikes. http://aranews.net/2016/04/isis-hiding-weapons-inside-mosques-iraqs-mosul/

April 28, 2016

Counterpunch published an article titled “Can Responsibility to Protect Preserve our Cultural Heritage in Syria?” (by Franklin Lamb) The author discusses the potential use of the controversial doctrine Responsibility to Protect (R2P) to protect cultural heritage threatened by ISIL and others. http://www.counterpunch.org/2016/04/28/can-responsibility-to-protect-preserve-our-cultural-heritage-in-syria/
International Business Times published an article titled “Ancient Mosul museum artefacts destroyed by Isis recreated with 3D technology and tourist photos” (by Umberto Bacchi). 3D models of artifacts destroyed by ISIL and reconstructed with a pioneering crowdsourcing system are going on show at the Museum of Arts and Design in New York City.

April 27, 2016

Pacific Standard Magazine published an article titled “There’s More to Syrian Archaeology Than Palmyra” (by Francie Diep). Emma Cunliffe discusses the cultural heritage crisis in Syria and her work with Heritage for Peace.
https://psmag.com/theres-more-to-syrian-archaeology-than-palmyra-33650c86f7b1#.pmr77fjbh

UNESCO published an article titled “UNESCO experts take preliminary stock of destruction in World Heritage site of Palmyra.” UNESCO experts conducted a technical rapid assessment mission to Palmyra. A full report will be presented in July 2016 to the World Heritage Committee at its 40th session, while an international meeting of experts on the preservation of Syria’s heritage sites will be held in early June.

Military and Political Context

The main theaters of military operations during the reporting period in Syria were:

1. Aleppo Governorate:
   ○ On April 27, ISIL militants captured five villages from Syrian opposition forces in the district of Azaz, near the Turkish border with Syria. ISIL’s media outlet Aamaq News Agency listed the captured villages as al-Fayruziyah, Dudiyan, Tulayl al-Hisn, Jariz, and Yahul.2
   ○ On April 27, clashes between Syrian opposition forces killed at least 64 fighters in northern Aleppo. Kurdish YPG forces paraded the bodies of 40-50 Syrian opposition fighters who were killed in battle through the city of Afrin.3
   ○ From April 27-May 10, clashes between SARG and opposition forces, exacerbated by SARG and possible Russian airstrikes, killed over 250 civilians in the city of Aleppo. Areas of the fighting included the neighborhoods of Sukari, Salhin, Bustan al-Qasar, al-Kalassa, Al-Marja, Al Ameriyah, al-Nayrab, Al Firdous, al-Midan, al-Lairamon, al-Sulaimaniyah, al-Sayyid Ali, Helluk, al-Zahra, Muhafaza and the old city of Aleppo, in addition to the nearby village of Kafr Hamra.4

---

On April 29, Syrian state media (SANA) reported that opposition forces shelled the “neighborhoods of Bab al-Faraj, al-Midan, al-Muhafaza, Seif al-Dawla, al-Iza’a, al-Martini, and al-Nile street” during weekly Friday prayers.5

On May 2, Turkish shelling and drone strikes killed 34 ISIL militants across the border in Syria. The attacks were in response to recent ISIL attacks that struck the Turkish province of Kilis. On May 7, Turkish forces again shelled areas of northern Aleppo, killing 55 ISIL militants.6

On May 3, ISIL militants reported that they had captured the northern Aleppo villages of Doudayan, Tel Shaer, and Iykda from opposition forces.7

On May 5, a 48-hour ceasefire agreed upon by Russia and the United States took effect in the city of Aleppo and the surrounding countryside. Despite the ceasefire, shelling and airstrikes continued sporadically across the city and in the surrounding areas. On May 7, the ceasefire was extended for an additional 72 hours. On May 9, the ceasefire was extended for a third time for 48 hours.8

On May 6, Jaish al-Fatah, an alliance of Islamist opposition forces, captured the village of Khan Touman from SARG forces after an overnight battle.9

2. Idlib Governorate:
   ○ On May 5, an airstrike reported to be of SARG or Russian origin struck the Kamouna IDP camp near the town of Sarmada, killing more than 30 people.\(^{10}\)
   ○ On May 9-10, SARG airstrikes struck several areas across Idlib Governorate including the towns of Maaret al-Numan, Binnish, and Hafsarja, resulting in civilian casualties.\(^{11}\)

3. Hama Governorate:
   ○ On May 2-6, hundreds of prisoners detained in Hama Central Prison took over the jail and captured several guards in protest of the transferring of prisoners to the Sednaya Military Prison located outside of Damascus. Opposition groups threatened SARG-held areas if the prisoners demands were not addressed. On May 6, SARG security forces stormed the prison. On May 9, a negotiated deal was reportedly reached with the facilitation of an opposition and a tribal leader.\(^{12}\)

4. Raqqā Governorate:
   ○ On May 2-3, as many as 35 airstrikes of either SARG or Russian origin struck areas of the ISIL-held city of Raqqā, killing at least 13 civilians and five ISIL militants.\(^{13}\)

5. Hasakah Governorate:
   ○ On April 28, the Syrian government reported the arrival of 150 US troops into the town of Rmeilan, deeming the action an “illegitimate intervention.”\(^{14}\)

6. Damascus Governorate:
   ○ On April 28, major Islamist opposition factions clashed in the towns of Misraba, Zamalka, and Kafr Batna.\(^{15}\)

7. Rif Dimashq Governorate:
   ○ On May 2, shelling and clashes between opposition groups occurred in the town of Beit Sawa, killing at least three civilians as well as a senior leader of Jaish al-Islam.\(^{16}\)
   ○ On May 4, clashes between opposition groups Faylaq al-Rahman (backed by Al Nusra Front) and Jaish al-Islam in the area of Eastern Ghouta killed at least 10 civilians and dozens of opposition fighters. In addition, Syrian activists reported that SARG forces carried out more than 20 airstrikes over the area.\(^{17}\)

8. Homs Governorate:
   - On May 4, ISIL militants captured Shaer Gas Field, north of the city of Homs.18
   - On May 5, an ISIL car and suicide bombing attack struck the majority-Alawite town of Mukharam al-Fawkani, east of the city of Homs, killing at least 10 civilians and wounding over 40 more.19
   - On May 10, ISIL militants took control of the road between the SARG-held cities of Homs and Palmyra, “near the Tayfur military airport”, cutting a key supply route.20

9. Quneitra Governorate:
   - On May 4, a car bomb struck a meeting at the office of the ‘Syrian Revolutionaries Front’ opposition group in the town of Asheh, killing 18 fighters including the commander of the group. No group claimed responsibility for the attack.21

Other Key Points:
- During the reporting period, the US-led coalition conducted airstrikes in ISIL-controlled areas of Ayn Isa, Deir ez Zor, Al-Hawl, Manbij, Mara, Palmyra, Shaddadi, Raqqa, Waleed, and Washiyah.22
- On April 29, the US and Russia reportedly agreed on a “regime of silence” in the areas of Latakia Governorate (for 72 hours) and the suburbs of Damascus (for 24 hours) to begin at midnight the same day. On May 2, the truce in Damascus was extended for an additional 24 hours.23
- On May 10, US officials reported that Turkish special military forces carried out an intelligence-gathering mission in Syria.24

The main theaters of military operations during the reporting period in Iraq were:

1. Baghdad Governorate:
   - On April 30, hundreds of supporters of prominent Shia cleric Moqtada al-Sadr (aka Sadrists) stormed the Green Zone, entering and occupying the Iraqi parliament building and leading to a declared “state of emergency” in Baghdad. On May 1, the demonstrators began exiting the Green Zone, however some protesters set up tents in the Green Zone signaling the possibility for an ongoing sit-in.25

---

25 http://iswresearch.blogspot.com/2016/04/warning-sadrists-storm-green-zone.html; http://iswresearch.blogspot.com/2016/05/sadr-attempts-de-facto-coup-in-
On May 2, a car bombing struck the neighborhood of Saydadiyah, killing at least 18 Shia pilgrims en route to the neighborhood of Kadhimiyah and wounding 45 more. ISIL later claimed responsibility for the attack.26

On May 6, a suicide car bomb detonated at an army checkpoint the area of Bismaya, west of the city of Baghdad, killed at least four Iraqi soldiers. Two bombings also struck near Abu Ghraib, killing three people and wounding 13 more.27

2. Erbil Governorate:
   - On April 27, Iraqi military forces, backed by US-led coalition airstrikes, restarted their offensive on the Makhmour area after a three week pause. Iraqi forces captured the village of Mahana.28
   - On April 30, the Turkish air force conducted airstrikes against Kurdistan Workers Party (PKK) targets in northern Iraq.29

3. Ninawa Governorate:
   - On April 27, Iraqi security forces captured the village of Al-Mihana.30
   - On May 2, ISIL militants staged a large-scale attack on the town of Tel Eskof before being pushed back by Kurdish Peshmerga, Christian militia forces, and US-led coalition airstrikes. The attack killed an American serviceman who was part of a “quick reaction force.”31
   - On May 4, ISIL militants attacked Peshmerga frontlines in the village of Qasabatal Rai, near the ISIL-held town of Tel Afar.32
   - On May 9, Iraqi security forces recaptured the village of Kabrouk, near the town of Qayyara.33

4. Al Anbar Governorate:
   - On May 3, Iraqi security forces were reported to have captured “all areas between Hit and al-Baghdadi”, west of the city of Ramadi.34
   - On May 6, a US-led coalition airstrike near the town of Rutba struck and killed ISIL Anbar Province commander Abu Wahib and three other ISIL militants.35

35 http://www.nytimes.com/2016/05/10/world/middleeast/iraq-airstrike-isis-el-wahib.html
5. Kirkuk Governorate:
   o On April 30, Kurdish Peshmerga forces and Shia militia forces, backed by US-led coalition airstrikes, recaptured the village of Bashir from ISIL militants. Peshmerga forces also reported regaining control of the villages of Albu Mafraj and Mazargay Imam, south of the city of Kirkuk.37
   o On May 4, explosions struck oil wells at Khabbaz oilfield near ISIL-held territory. No group has yet claimed responsibility for the attack.38

6. Salah ad Din Governorate:
   o On April 29, senior Shia and Kurdish leaders agreed to withdraw their forces from the town of Tuz Khurmato in an effort to end the ongoing violence in the area. Local police will now take control of the town.39

7. Al Muthanna Governorate:
   o On May 1, ISIL carried out two suicide car bombings near a local government building and a nearby bus station in the city of Samawah, killing at least 37 people and wounding nearly 90 more.40

8. Diyala Governorate:
   o On May 9, an ISIL car bombing occurred in the Baquba city neighborhood of Shifa, killing at least 13 people and wounding 60 others.41

9. Babil Governorate:
   o On May 5, an IED detonated at a funeral in the al-Hasawa cemetery, north of the city of Hilla, killing five people and wounding 12 more.42

Other Key Points:
- During the reporting period, the US-led coalition conducted airstrikes in the areas of Albu Hayat, Baghdad, Bashir, Beiji, Fallujah, Habbaniyah, Huwayjah, Hit, Kirkuk, Kisik, Makhmour, Mosul, Qaim, Qayyarah, Ramadi, Rutbah, Sinjar, Sultan Abdullah, Tal Afar, and Waleed.43
- On April 30, Sadrist protesters attacked Dawa party headquarters and other governmental buildings in the cities of Nasriyah (Dhi Qar Governorate), Diwaniyah (Al Qadisiyah Governorate), and Karbala (Karbala’ Governorate).44
- On May 7, UN Envoy for Iraq reported that more than 50 mass graves had been uncovered in formerly controlled ISIL territories across Iraq.45

Satellite Imagery and Geospatial Analysis

While recent reports have described the damage done to the al-Ma‘arra Museum in Ma‘arat al-Nu‘man (see ASOR CHI Incident Report SHI 16-0063 in this weekly report), little has been reported about the other historical sites in the city. DigitalGlobe satellite imagery from April 22, 2016 shows the continuing damage to sites within Ma‘arat al-Nu‘man. ASOR CHI previously reported the Khan Assad Pasha al-Azem was damaged in a raid by an armed faction (see ASOR CHI Incident Report SHI 15-0120 in Weekly Report 55-56). This new satellite imagery showed the damage to the center of the north wall as well as damage to the northwest corner of the roof with a small hole and debris on top of the building.

In addition to the Khan Assad Pasha al-Azem, the Madrasa Abu al-Fawaris also appears to have been severely damaged. While the DigitalGlobe imagery is not of the highest quality, the building is no longer visible. Either the building is no longer standing or the roof is so covered with debris from the combat that it completely blends into its surroundings. ASOR CHI has not recorded any previous incidents to this specific building so it is unclear when this damage occurred. The building is no longer seen after July 4, 2015. More monitoring is necessary to confirm or understand the situation on the ground.

Recent image over Mosul has allowed ASOR CHI to check some unconfirmed damage reports within the city. Previous reports stated that the Kanisat al-Sa‘a, also known as the Latin Church or the Clock Tower Church, had been blown up by ISIL militants on April 25, 2016. However, recent DigitalGlobe imagery from May 9, 2016 shows the church is completely intact with no obvious damage.

The recent DigitalGlobe imagery from May 2, May 8, and May 9, 2016 also showed multiple forms of damage to the ancient site of Nineveh. ASOR CHI was able to confirm the intentional destruction of the Adad and Mashki Gates, the dismantling of the Sennacherib Palace, continuing construction on site, and multiple examples of tunnel looting (see ASOR CHI Incident Report IHI 16-0010 UPDATE and IHI 16-0013 in this report.)

Khan Assad Pasha al-Azem with visible damage on eastern wall from previous combat (DigitalGlobe; July 4, 2015)

Damage to the northern wall and northwest corner (DigitalGlobe; April 22, 2016)
Madrasa Abu al-Fawaris still visible, note the dome and the wall edges (DigitalGlobe; October 12, 2013)

Madrasa Abu al-Fawaris not visible with no clear indication of standing walls (DigitalGlobe; April 22, 2016)

Kanisat al-Sa’a still standing intact after false reports of its destruction by ISIL (DigitalGlobe; May 2, 2016)
Incident Reports: Syria

SHI 16-0045 UPDATE

Report Date: April 5, 2016

Site Name: Abu Bakr al-Sidiq Mosque (مسجد أبو بكر الصديق)

Date of Incident: April 5, 2016

Location: Dumeir, Rif Dimashq Governorate, Syria

Site Description: Mosque

Site Date: 2010

Incident Summary: New photographs of the damage to Abu Bakr al-Sidiq Mosque.

Incident Source and Description: On April 5, 2016 the Syrian Network for Human Rights reported that SARG airstrikes severely damaged the Abu Bakr al-Sidiq Mosque in Dumeir, northeast of Damascus. No photographs of the damage were provided at the time. Overall, on April 5 SNHR reported that SARG airstrikes resulted in the deaths of at least eight people.

On April 28, 2016 the activist group Integrated Relief Office for Dumeir posted on its Facebook page a video of the mosque and the damage it sustained, as well as a list of the costs associated with the renovation and repair of the mosque. In total, the renovations are expected to cost around 2.5 million Syrian pounds, which includes repair or replacement of the front wall, one of the main doors, windows, speakers, water tanks, the minaret, and light fixtures and the removal of rubble.

The video provided by Integrated Relief Office for Dumeir shows the moment the mosque was hit by the airstrike and the damage it sustained. A photo posted by the group on May 6, 2016 shows an earthmover removing rubble from the area around the mosque.

On May 11, 2016 SNHR provided a photograph of the damage to the mosque in its "Most Vital Facilities Report" for April 2016, which shows damage to the mosque’s entrance.

Pattern: Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI remains concerned about SARG airstrikes on mosques and other cultural heritage in and around Damascus. ASOR CHI will continue to monitor the situation of these mosques as well as other cultural heritage sites in areas under aerial bombardment.

- Al Farouq Mosque - Karm al-Jazmati Neighborhood

Site Description: Mosques in several neighborhoods in Aleppo, including:
- Takiyya Mawlawiye - is a lodge for Sufi dervishes located west of the Old City of Aleppo. Its foundation date is unclear, but the structure was probably built in the mid- to late 16th-century CE after the Ottoman takeover of Aleppo. The Mawlawi Sufi brotherhood was introduced to Aleppo province at this time. Additions were made to the original structure until the 20th-century (the Mawlawi order was banned in Aleppo in 1950). The Takiyya consists of several buildings. An outer wall surrounds a cluster of freestanding buildings, pierced by a doorway surmounted by an octagonal minaret. The inner courtyard contains a pool and is surrounded by structures from various periods, including a mosque (probably added in the late 17th-century), a sama khana (a space where the Sama, the traditional ritual dance of the whirling dervishes is conducted), a kitchen, cells for the dervishes, and tombs.\(^52\)

- Nabhaniyah Institute - An older building converted to a school in 1964 CE.

Site Date: Various, some modern sites; Takiyya Mawlawiye: ca. 1650 CE

Incident Summary: Shelling and airstrikes damage several built heritage sites in the city of Aleppo.

\(^{52}\) Watenpaugh (2004): 130-3; Hadjar(2000): 69
**Incident Source and Description:** Between April 29-May 9, 2016 various built heritage sites in the city of Aleppo were damaged by airstrikes, shelling, and other collateral violence. During this period SARG (and possibly Russian) airstrikes reportedly struck and damaged the following sites: Owais Al Qarni Mosque, Al Hussein Mosque, and the Nabhaniyah Institute. Syrian armed opposition forces shelled and reportedly struck the Mawla Khan Mosque, the Aisha Mosque, and stormed the SARG-held Great Prophet Mosque. In addition, unknown shelling and explosives struck and damaged Al Hajjar and Al Farooq Mosque.

On April 29, 2016 the Syrian Network for Human Rights (SNHR) reported that SARG warplanes fired two missiles on Owais Al Qarni Mosque in Al Sukari neighborhood, causing partial damage to the building. In a report by SNHR published on May 1, 2016 the mosque is described to have suffered ‘medium’ damage to the building and partial damage to the surrounding fence.

On April 29, 2016 SNHR reported that airstrikes by either SARG or Russian forces damaged Al Hussein Mosque in the opposition-held neighborhood of Al Qaterji. Video footage re-published by SNHR depicts extensive damage to the mosque as well as damage to the buildings and street surrounding the mosque. In a report generated by SNHR on May 1, 2016 Al Hussein Mosque was reported to be partially destroyed and rendered out of service. A Syrian Civil Defense member reported that many airstrikes on Friday, April 29 struck areas around mosques in the city of Aleppo. This led to accusations that SARG forces were deliberately targeting areas such as these in an effort to force civilians to abandon the city.

On April 29, 2016 the Syrian state news agency SANA reported that armed opposition group shelling on the Mawla Khan Mosque killed 16 civilian worshippers and injured 41 more. The shelling reportedly occurred as Friday prayers were ongoing in the neighborhood of Bab al-Faraj. The extent of the damage to the mosque is unknown.

On April 29, 2016 Khaled al Homsi, a Syrian opposition activist, posted photographs on Twitter showing severe damage to the Nabhaniyah Institute that he alleges were caused by SARG airstrikes. Previous damage to the building occurred on August 11, 2014 when SARG forces dropped a barrel bomb on or near the school, causing material damage.

On May 2, 2016 Ahlu Bayt News Agency reported that opposition forces made up of Al Nusra Front, the Free Syrian Army (FSA), Jaish Al-Mujahideen, and Harakat Nourideen Al-Zinki launched a coordinated offensive against the regime-held areas of Al-Khalidiyah and az-Zahraa in western Aleppo city. The opposition forces began their assault by storming the Great Prophet Mosque,

which was occupied by SARG forces. This attack was repelled and the mosque was regained by SARG forces.\textsuperscript{63} No damage to the mosque was reported. SARG forces captured the mosque from FSA control in May 2014.\textsuperscript{64}

On May 3, 2016 az-Zahraa Neighborhood News Network in Aleppo reported that opposition shelling struck the area surrounding Aisha Mosque.\textsuperscript{65} The mosque subsequently caught fire, forcing those inside and in the surrounding area to flee.\textsuperscript{66} Aisha Mosque has been previously damaged by shelling (see ASOR CHI Incident Report SHI 16-0040 in Weekly Report 85-86).

On May 9, 2016 Idlib News Network reported that shelling struck Al Hajjar Mosque in the neighborhood of Suleiman al-Halabi. Al Hajjar Mosque has been struck by explosives at least once before according to the local source 'Eye on Halab'.\textsuperscript{67}

On May 9, 2016 Halab News Network reported that airstrikes of unknown origin struck Al Farooq Mosque in the neighborhood of Karm al-Jazmati, causing damage.\textsuperscript{68} Photographs taken of the mosque show interior and exterior damage to the mosque.

**Pattern:** Military activity: explosives, occupation/militarization.

**Monitoring Recommendations and Mitigation Measures:** ASOR CHI remains concerned about SARG airstrikes on mosques and other cultural heritage in and around Aleppo. ASOR CHI will attempt to gather further information on damage to the sites listed as damaged in this incident report, and will continue to monitor heritage sites in regions subject to ongoing aerial bombardment campaigns and intense military activity.

Report Date: May 7, 2016

Site Name: Iman Mosque (مسجد الإيمان; تكية الشيخ عبد الله)

Date of Incident: May 7, 2016

Location: Deir ez-Zor, Deir ez-Zor Governorate, Syria

Site Description: The Takiyat of Sheikh Abdullah is one of three Ottoman-era takaya (Sufi lodges) remaining in Deir ez-Zor. It was built in 1906 CE by Sheikh Ahmed al-Ezzi al-Niqashbandi al-Sagheer. In 2014, ISIL militants occupying Deir ez-Zor attempted to close the Takiyat as part of a campaign to close or destroy structures (often belonging to Sufi or Shiite sects) they deem “un-Islamic.” An ISIL judge apparently objected to the presence of the tomb of the founder within the Takiyat. A local religious leader argued that the tombs had already been removed, and that the Takiyat should be reopened. The ISIL judge acquiesced, although he insisted the Takiyat of Sheikh Abdullah be renamed “Iman Mosque.”

Site Date: 1906 CE (minaret added 1978)

Incident Summary: A SARG airstrike reportedly damaged a mosque.

Incident Source and Description: On May 7, 2016 Syrian Network for Human Rights reported that a SARG airstrike hit the Iman Mosque in Deir ez-Zor, damaging the building and its minaret, and rendering it inoperable. No photographs were made available at the time of publication.

Pattern: Military activity: explosives

Monitoring Recommendations and Mitigation Measures: ASOR CHI will attempt to gather further information on damage to the Iman Mosque and will continue to monitor heritage sites in regions subject to ongoing aerial bombardment campaigns and intense military activity.

- Al-Jawari Mosque (جامع الجوهر)
- Omari Mosque (جامع عمري), possibly known as Abi Thar al Ghafari Mosque

Date of Incident: May 9, 2016

Location: Idlib City, Idlib Governorate, Syria

Site Description:
- Idlib Museum - The main tourist attraction for the city, the Idlib regional museum reportedly contained more than 17,000 tablets from Ebla as well as other artifacts, including ceramics dating to the Ayyubid period.
- Al-Jawari Mosque - Mosque
- Omari Mosque - Mosque

Site Date:
- Idlib Museum - Modern
- Al-Jawari Mosque - Unknown
- Omari Mosque - Unknown

Incident Summary: SARG airstrikes allegedly cause damage in Idlib city.

Incident Source and Description: On May 9, 2016 the Syrian Network for Human Rights (SNHR) reported that SARG airstrikes struck near the National Museum in Idlib city, causing partial damage to the museum’s fence.71 Photographs shared by Idlib Antiquities Center labeled three photographs as the Idlib Museum. The photographs appear to show damage to an exterior area of the museum, possibly confirming that the damage was limited to the fence.72

The National Museum in Idlib city has previously been damaged by military activity, as well as theft (see ASOR CHI Incident Report SHI 14-0020 in Weekly Report 3 and SHI 15-0060 in Weekly Report 35).

On May 9, 2016 the Syrian Press Center reported that SARG airstrikes also struck Al-Johari Mosque in the city of Idlib, causing damage and civilian casualties.73 Dozens of airstrikes were reported across Idlib Governorate on May 9-10, 2016.

On May 9, Orient News and other local sources reported that Omari Mosque in the city of Idlib had been damaged by airstrikes.74 Little detail was known as to the damage inflicted as a result of these strikes. In addition, other mosques were named as being struck, however it is unclear if these

Report Date: May 9, 2016

Site Name: Al-Ma’arra Museum (Khan Murad Basha Museum) (متحف خان مراد باشا)

Date of Incident: May 9, 2016

Location: Ma’arat al-Numan, Idlib Governorate, Syria

Site Description: According to Ross Burns:

“The Maarat al-Numan Museum] contains an interesting collection of objects including mosaics and pottery from many periods... The mosaics have been transferred from nearby sites including a fifth century mosaic from as far as Homs... In the centre of the courtyard is a tekkiye or foundation for the instruction of initiates to the Dervish sect. A doorway to the left once led to the hammam and suq attached to the khan (now managed separately). Opposite the museum is another Ottoman khan, the Khan Assad Pasha al-Azem. [The Khan Murad Pasha] has been converted to a museum with striking effect. It contains an interesting collection of objects including mosaics and pottery from many periods, a tribute to the late curator Kamel Chéhadé. The mosaics have been transferred from nearby sites including a fifth century mosaic from as far as Homs. Note especially the mosaic depicting Romulus and Remus found at al-Firkiye (north of Maarat) and dated to 510. A second mosaic of the same date from al-Firkiye animals in a field bordered by vines....”76

Site Date: Historic Khan Murad Pasha 1565 CE

Incident Summary: SARG airstrikes damage museum.

Incident Source and Description: On May 9, 2016 ASOR CHI in-country sources reported that airstrikes had hit the Al-Ma’arra Museum in the city of Ma’arat al-Numan, causing partial damage to the building. Local news reports confirmed this incident and attributed the damage to SARG airstrikes.

Al-Ma’arra Museum has been struck several times by airstrikes in the past, causing increasing damage to the interior and exterior of the building as well as the artifacts located within the site (see ASOR CHI Incident Report SHI 14-0016 in Weekly Report 2; SHI 14-0041 in Weekly Report 9; SHI 14-0101 in Weekly Report 20; SHI 15-0098 in Weekly Report 46).

Pattern: Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will attempt to gather further information on damage to Al-Ma’arra Museum and will continue to monitor heritage sites in regions subject to ongoing aerial bombardment campaigns and intense military activity.

Airstrike damage to the Al-Ma’arra Museum (Al Watan FM; May 9, 2015)
Airstrike damage to the Al-Ma’arrat Museum (Al Watan FM; May 9, 2015)
On Monday May 9th, 2016 at noon, the Museum of Ma’arrat Al-Noman was struck for the second time by the Syrian regime air force with two thermobaric bombs. The attack targeted the museum also known as Khan Murad Basha which was built in the 16th century during the Ottoman era (1564) and served as a Caravanserai, restaurant, and rest area for travelers.

The Khan occupies an area of 1.7 acres and is divided into 4 wings topped with domes. The wings are connected to service facilities: The central courtyard included a mosque and a restaurant, whereas the west wing housed a market place, a bathhouse, a bakery, grains storage area, and a water station that supplies the whole facility.

The damage caused by this most recent airstrike is severe especially in the bathhouse area and in the fourth ward on the west side of the building. The Day After Heritage Protection Initiative (TDA-HPI) site monitors team in conjunction with the Cultural Heritage Preservation Center (from Ma’arra) conducted an onsite assessment of the damage and documented it along with recommended urgent repairs stabilize the damaged areas and prevent further deterioration.

The documented damage:

1- A breach in the western wall of the building in the fourth wing. The resulting rubble landed inside on the mosaics that the TDA Site Monitors team had previously sandbagged for protection. This measure was effective in preserving the mosaics, the most important of which is that of “Hercules”.

2- Damage to the northwestern wall separating the Khan/museum from the bathhouse, which caused part of the exterior wall to collapse into the narrow corridor separating the two buildings.

3- The bathhouse roof including the dome and cupolas sustained severe damages.

---

These reports are based on research conducted by “The Day After Heritage Protection Initiative.” This report reflects analysis from an independent organization. As with the Weekly Reports produced by ASOR CHI, it should be treated as preliminary and subject to change.
Narrow corridor/between Bathouse and Khan (Museum). Damage cause a breach/opening in the external wall of the museum.
Damage causing a breach in the wall (inside)

Damage causing a breach in the wall (outside)
Rubble collapse over the mosaic of Hercules. The mosaic appears to be undamaged due to the protection provided by the sandbags.
Rubble collapse over mosaic

Damage to external wall (see plan above)
Damaged Cupola

Roof of the Bathhouse (Hammam)
Damage to the main dome on the Bathhouse (Hammam) roof

Update on: Preliminary Damage Report Ma’arra, Museum Airstrike May 9, 2016.

Follow up report on the emergency cleanup operation in the damaged fourth wing of the Ma’ara museum by the TDA-HPI Site Monitors team in cooperation with Syrian Culture Centre, May 11, 2016.

Work began to clear the rubble, and the fallen stone masonry was gathered and placed to one side. The sandbagged floor mosaics near the strike zone were uncovered and inspected then recovered with additional new sandbags for increased protection. A number of mosaics that had been stored in this wing were also moved as a precautionary measure to the first wing for safety.
Cleanup operations in the west wing of the museum
Filling up new sandbags
Moving mosaics for better protection
Moving mosaics
Stone masonry piled up for safekeeping

Report Date: May 10, 2016

Site Name: Sheikh Shuayab Mosque (مسجد شيخ شعيب)

Date of Incident: May 10, 2016

Location: Binnish, Idlib Governorate, Syria

Site Description: Mosque

Site Date: Modern

Incident Summary: A SARG airstrike allegedly damaged a mosque.

Incident Source and Description: On May 10, 2016 Syrian Network for Human Rights reported a SARG airstrike damaged the Sheikh Shuayab Mosque in Binnish, damaging the mosque severely. In addition, video footage was published online, allegedly showing the moment a missile struck the mosque. Overall, airstrikes in Binnish on May 10 killed at least nine civilians.

Pattern: Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will attempt to gather further information on damage to Sheikh Shuayab Mosque and will continue to monitor heritage sites in regions subject to ongoing aerial bombardment campaigns and intense military activity.

Incident Reports: Iraq

IHI 16-0010

Report Date: April 14, 2016

Site Name: Nineveh including the Mashki Gate (بوابة المسطى), Adad Gate (بوابة ادد), and Nergal Gate (بوابة نركال)

Date of Incident: Mashki Gate: April 10, 2016; Adad and Nergal Gates: April 14, 2016

Location: Mosul, Ninawa Governorate, Iraq

Site Description:

- **Mashki Gate (بوابة المسطى)** - The Mashki Gate is dated to the reign of Sennacherib (701-681 BCE). Located on the Tigris River, the gate’s name may be translated as the “Gate of Watering Places.” The exterior of the gate included stone steps leading down to the river, an indication that livestock would be driven through this gate to drink. Excavation and reconstruction of the gate took place between 1967-1971 under the auspices of the Iraq Department of Antiquities. The interior of the gate was excavated by David Stronach of UC Berkeley in 1989–1990.81

- **Adad Gate (بوابة ادد)** - The Adad Gate, named for the storm-god Adad or Hadad, is located east of the Nergal Gate, on the northern side of Nineveh. Excavations at this site turned up large tiles dating to the reign of Sennacherib (701-681 BCE).82 This gate was excavated and reconstructed by the University of Mosul in the 1960s.83 The reconstruction is a mixture of concrete and mudbrick.84

- **Nergal Gate (بوابة نركال)** - The Nergal Gate, named for the god Nergal, was located on the northern side of Nineveh. The gate was reconstructed by Iraq’s Department of Antiquities in the 1950s in order to protect winged bulls located there and create a local museum.85 Dating to the reign of Sennacherib, A.H. Layard, one of the first archaeologists to explore Nineveh, offers this description of the gate:It was apparently the remains of a gate leading into this quarter of the city, and part of a building, with fragments of two colossal winged figures, had already been discovered in it... Following the rows of limestone slabs, from the south side of the mound, and passing through two halls or chambers, we came at length to the opposite entrance. This gateway, facing the open country, was formed by a pair of majestic human-headed bulls, fourteen feet in length, and still entire, though cracked and injured by fire.86

Site Date: 700–681 BCE (Assyrian)

Incident Summary: ISIL militants level several of the gates of Nineveh.

**Incident Source and Description:** ASOR CHI can now confirm via satellite imagery and on the ground photography that the Mashki and Adad Gates have been destroyed. However the Nergal Gate is still standing undamaged. The photo previously attributed to the Nergal Gate was actually the Adad Gate or a section of the ancient wall. In DigitalGlobe satellite images from May 2, 2016, both the Mashki and Adad Gates have been demolished to their foundations. Only the base of the Adad Gate is still visible. The city walls around these gates were also destroyed by earthmovers and the debris from these destructions was cleared away. Looting tunnels were also visible.

On April 10, 2016 the Iraqi activist group Mosulyoon reported that ISIL militants destroyed the Mashki Gate at Nineveh using earthmovers. According to other news sources, local activists in Mosul reported the damage to the Mashki Gate and provided unconfirmed reports that the stones from the gate were being sold by ISIL.

On April 14, 2016 Al Masdar and other news outlets reported that ISIL destroyed the Adad Gate and other portions of the ancient wall of Nineveh. In addition, the Facebook group Endangered Heritage Sites in Iraq reported that ISIL militants had also destroyed the Nergal Gate. The Nergal Gate suffered significant damage by ISIL militants, who in February 2015 released a video in which militants defaced the winged bulls at the gate with sledgehammers and drills (see ASOR CHI Incident Report IHI 15-0033 in Weekly Report 30).

An in-country ASOR CHI source provided photographs showing the destruction of the Mashki and Nergal Gates, taken from inside a moving vehicle on the road outside the walls of the ancient site. The images of the Mashki Gate shows the structure in ruins. In the other photograph, an earthmover is leveling the hill and moving toward what the photographer reported is the Nergal Gate; it is assumed by the photographer that the gate has been destroyed.

Sputnik Arabic and Russia Today also reported that ISIL militants were digging tunnels within the archaeological boundaries at Nineveh and provided a video of the activity. DigitalGlobe satellite imagery dating to May 2, 2016 show four looting pits within the northern portion of Nineveh. A more recent DigitalGlobe satellite image from May 9, 2016 covered the southern part of the image where an additional four looting pits were identified. These pits were created by tunneling into the side of the mound. This type of tunnel excavation was detailed in ASOR CHI Weekly Report 85-86 within the region of Tel Afar.

**Pattern:** Military activity: intentional destruction; Military activity: earthworks/roadwork; Illegal excavation.

**Monitoring Recommendations and Mitigation Measures:** ASOR CHI will continue to monitor reports of damage to Nineveh and other cultural heritage sites in the city of Mosul and in Ninawa Governorate.

IHI 16-0013

Report Date: May 9, 2016

Site Name: Nineveh, including the Southwest Palace of Sennacherib

Date of Incident: Ongoing since April 1, 2016

Location: Mosul, Ninawa Governorate, Iraq

Site Description: In 705 BCE, the Assyrian king Sennacherib moved his capital from Dur Sharrukin to Nineveh, where he built a palace that he called the “Palace without rival.” The palace was situated on the southwest corner of the mound of Kouyunjik within the walls of ancient Nineveh and consisted of at least 80 rooms, nearly all lined with stone slabs carved with scenes commemorating Sennacherib’s military campaigns and with doors guarded by winged bulls and other protective figures. It was destroyed in 612 BCE and rediscovered and excavated in 1847 by Austin Henry Layard, who discovered several wall reliefs and cuneiform inscriptions describing Sennacherib’s sieges of the cities of Lachish and Jerusalem, events also described in the Old Testament. A number of important cuneiform tablets were also discovered in the palace. These discoveries continue to garner a huge degree of public interest in Sennacherib’s palace and the site of Nineveh.\(^\text{87}\)

In the 1960s, the Iraq Department of Antiquities consolidated the walls and sculptures and roofed the site over as the Sennacherib Palace Site Museum. This consists of four restored rooms in the throne-room suite, which contained at the time around 100 carved reliefs in various states of preservation.\(^\text{88}\) In the 1990s and 2000s, some of these reliefs were looted or partially looted. 10-15 fragments of these reliefs appeared on the art market. No recent publications discuss exactly what still remains in situ. A 1991 publication indicates that at that time, Room I had 17 whole and fragmentary slabs on display in situ, Room IV had 14, and Room V had 51.\(^\text{89}\) By 1996, at least three reliefs from Room I, one from Room IV, and six from Room V were at least partially looted (meaning a section of the relief was removed), as well as several from other rooms in the palace.\(^\text{90}\)

Site Date: 700 - 681 BCE (Neo-Assyrian)

Incident Summary: Ongoing damage to site of Nineveh, including looting and dismantling of site museum.

Incident Source and Description: Between April 1, 2016 and May 2, 2016 the protective roof over the southwest palace area, installed in 2004, was removed and the metal likely sold for scrap or reused. The DigitalGlobe satellite imagery from May 2, 2016 showed the mudbrick towers flanking the Grand Entrance intact, but the brick walls dividing the Throne Room (Room I) from Room V are mostly gone. Only the metal support pillars, surrounded by brick, remain. The southwestern corner of Room V is still intact possibly with the reliefs in place along the western wall. Room IV appears untouched with all walls still intact. Vehicle tracks leading up to the Grand Entrance of the Palace are visible.

\(^\text{87}\) Russell 1991: 2-5
\(^\text{89}\) Russell 1991: 47, 50, 52
Between May 2 to May 8, 2016, the palace was further dismantled with the remaining metal pillars between Rooms I and V completely removed and the rest of the brick walls of Rooms I, IV, and V almost totally dismantled. Only small sections of the southern and western walls of Room V and the south wall of Room IV remain. Vehicle tracks now can be seen going inside the palace rooms, likely to remove the debris from the interior walls, and also now running directly through the Grand Entrance, which still appears to be relatively intact. There is no clear additional damage visible between May 8 and May 9, 2016.

Additionally, construction was also identified on these recent satellite images. A bridge was constructed over the river from the north part of the site to the southern city area. This bridge was then used to park trucks and large vehicles onto the archaeological site. The multi lane road through the southern portion of Nineveh has not been completed with no new construction since April 1, 2016, and is only partially paved.

**Pattern:** Military activity: intentional destruction; Illegal excavation; Theft.

**Monitoring Recommendations and Mitigation Measures:** ASOR CHI will continue to monitor reports of damage and looting at this and other cultural heritage sites in the city of Mosul and in Ninawa Governorate.
