¹ This report is based on research conducted by the “Cultural Preservation Initiative: Planning for Safeguarding Heritage Sites in Syria and Iraq.” Weekly reports reflect reporting from a variety of sources and may contain unverified material. As such, they should be treated as preliminary and subject to change.

Other Key Points

Syria

- Aleppo Governorate
 - A car bomb damaged al-Kabir Mosque in al-Bab, Aleppo Governorate. **ASOR CHI Incident Report SHI 18-0081**
 - Satellite imagery shows evidence of illegal excavation at Cyrrhus in Nebi Hourri, Aleppo Governorate. **ASOR CHI Incident Report SHI 18-0090**
 - Unknown perpetrators damaged a Kurdish cemetery, Martyr Seydo in Kafr Safra, Aleppo Governorate. **ASOR CHI Incident Report SHI 18-0092**
- Damascus
 - SARG forces captured the Ali Bin Abi Talib Mosque in Damascus, Damascus Governorate. **ASOR CHI Incident Report SHI 18-0085**
 - Heavy shelling damaged the Palestinian Mosque in Damascus, Damascus Governorate. **ASOR CHI Incident Report SHI 18-0087**
 - Possible SARG shelling damaged the Palestinian Arab Cultural Center in Damascus, Damascus Governorate. **ASOR CHI Incident Report SHI 18-0095**
 - Possible SARG shelling damaged the Palestinian Martyrs Cemetery in Damascus, Damascus Governorate. **ASOR CHI Incident Report SHI 18-0096**
- Daraa Governorate
 - Photographs reveal flooding in the Roman Theater in Bosra, Daraa Governorate. **ASOR CHI Incident Report SHI 18-0091**
- Deir ez-Zor Governorate
 - The Directorate-General of Antiquities and Museums (DGAM) in Syria published a new report about Mari, Tell Hariri, Deir ez-Zor Governorate. **ASOR CHI Incident Report SHI 17-0224 UPDATE**
 - A reported Iranian organization built a shrine at Ein Ali, Deir ez-Zor Governorate. **ASOR CHI Incident Report SHI 18-0088**
 - Unknown forces destroyed the Tell Ein Ali Tower in Deir ez-Zor Governorate. **ASOR CHI Incident Report SHI 18-0089**
- Homs Governorate
 - An alleged SARG airstrike damaged al-Omari Mosque in Rastan, Homs Governorate. **ASOR CHI Incident Report SHI 18-0098**
- Idlib Governorate
 - Reported Russian airstrikes damaged al-Kabir Mosque in Ariha, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0079**
 - Reported SARG airstrikes damaged al-Rahman Mosque in al-Bara, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0080**
 - Reported SARG shelling damaged al-Maghrebi Mosque in Jisr al-Shughour, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0082**
 - Satellite imagery reveals ongoing damage due to illegal excavations and military occupation at Ebla, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0083**
 - An explosion damaged Suhaib al-Rumi Mosque in Idlib, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0084**
 - Alleged Hayat Tahrir al-Sham militants destroyed a Roman column in Banabel, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0086**

- An alleged Russian airstrike damaged al-Kabir Mosque in Ma'ar Zita, Idlib Governorate. **ASOR CHI Incident Report SHI 18-0097**
- Rif Dimashq Governorate
 - Possible SARG shelling damaged al-Bara bin Azab Mosque in Hajar al-Aswad, Rif Dimashq Governorate. **ASOR CHI Incident Report SHI 18-0093**
 - Possible SARG shelling damaged al-Abbas Mosque in Hajar al-Aswad, Rif Dimashq Governorate. **ASOR CHI Incident Report SHI 18-0094**

Iraq

No Incident Reports

Libya

- Fezzan
 - Ongoing fighting damaged Sabha Castle in Sabha, Fezzan. **ASOR CHI Incident Report LHI 18-0016 UPDATE**
- Tripolitania
 - Natural impacts and lack of maintenance caused the collapse of historic buildings in Ghadames, Tripolitania. **ASOR CHI Incident Report LHI 18-0002 UPDATE**
 - Thieves allegedly stole bells from the Anglican Church of Christ the King in Tripoli, Tripolitania. **ASOR CHI Incident Report LHI 18-0019**
- Cyrenaica
 - A fire broke out in a storeroom containing artifacts in Sidi Khrebish (Berenice) in Benghazi, Cyrenaica. **ASOR CHI Incident Report LHI 18-0020**

Military and Political Context

The main theaters of military operations during the reporting period in Syria were:

1. Rif Dimashq Governorate:
 - On April 1, *Reuters* reported that Jaish al-Islam, civic leaders, and Russia had reached an agreement to evacuate critically injured people from the town of Douma. Hezbollah media reported that an agreement for the evacuation of Jaish al-Islam fighters had also been reached.²
 - On April 2, Syrian state media reported that initial evacuations of Jaish al-Islam, the last opposition group in Eastern Ghouta, had begun. Members of Jaish al-Islam were reportedly evacuated to the northern towns of Jarablus, Idlib Governorate and al-Bab, Aleppo Governorate.³
 - On April 3, members of the Free Syrian Army (FSA) reported that the Syrian regime had warned them, via civilian channels, that “they must accept state rule or leave.” The FSA holds several towns in Eastern Qalamoun. According to the FSA, an offer was made to the regime for the opposition forces to withdraw from the towns and into the mountains, allowing civilians to stay.⁴

⁴ <https://www.reuters.com/article/us-mideast-crisis-syria/russia-assad-give-ultimatum-to-syria-rebels-northeast-of-damascus-idUSKCN1HA0VP>

- On April 3, the Russian Defence Ministry reported that more than 40,000 civilians had returned to Eastern Ghouta after fleeing the violence in the area. International aid organizations, present on the ground, have not confirmed the return.⁵
- On April 7–8, local sources reported that a suspected SARG chemical weapons attack in Duma killed at least 40 people, including children. The Syrian regime and Russia denied that a chemical attack had taken place. According to the World Health Organization, 500 Syrians had been treated for exposure to chemical agents as a result of the attack.⁶
- On April 8, Syrian opposition fighters belonging to Jaish al-Islam began evacuating Duma in the “first phase” of a Russian-negotiated agreement with the Syrian regime. The evacuations was overseen by Russian military police. The opposition forces were permitted to travel to opposition-held areas of northern Syria in exchange for the release of “hundreds of hostages and prisoners of war.”⁷
- On April 9, the Organization for the Prohibition of Chemical Weapons (OPCW) reported that they would be sending a team to Duma to investigate claims that the Syrian regime conducted chemical weapons attacks.⁸
- On April 10, dozens of evacuated Syrian opposition fighters and residents from Duma reached opposition-held areas of Aleppo Governorate. Evacuations continued in Duma.⁹
- On April 11, the Russian military announced that the Syrian regime had taken full control of Duma.¹⁰
- On April 13–14, US, UK, and French military jets took part in targeted airstrikes in Syria in response to a reported chemical attack in Duma. According to the Pentagon, the strikes targeted a scientific research facility in Damascus, a chemical weapons storage facility west of the city of Homs, and a chemical weapons equipment storage site and command post near Homs.¹¹
- On April 14, members of the Syrian army entered Duma. The Syrian regime now controls the entirety of Damascus and the suburbs of Eastern Ghouta.¹²

¹² <http://www.latimes.com/world/middleeast/la-fg-syria-ghouta-2018-story.html>

- On April 19, the Syrian military reportedly gave ISIS fighters 48 hours to leave their pockets of control near Damascus, namely the Palestinian refugee camp of Yarmouk, the district of Hajar al-Aswad, and surrounding neighborhoods. Syrian opposition forces also began leaving the northeast enclave of Dumayr. Opposition forces based in areas of Eastern Qalamoun also reportedly agreed to withdraw.¹³
 - On April 20, ISIS fighters reportedly agreed to evacuate the Yarmouk refugee camp, the district of Hajar al-Aswad, and neighboring areas. Despite this supposed agreement, military activity continued in the area, including aerial bombardment. The surrender of the area will bring the entire region surrounding Damascus back under Assad control.¹⁴
 - On April 21, chemical weapons experts from the Organization for the Prohibition of Chemical Weapons (OPCW) finally visited a suspected chemical attack site in Duma.¹⁵
 - On April 22–23, the Syrian army targeted areas south of Damascus that remain under ISIS control.¹⁶
2. Homs Governorate:
- On April 9, the Syrian regime and Russia accused Israel of carrying out an airstrike on the Tiyas Airbase (aka T4 Airbase), located near the city of Homs. According to reports, 14 pro-regime forces, including seven Iranian nationals, were killed in the strike. A report by the *New York Times* later reported that the US conferred with Israeli officials prior to the strike.¹⁷
 - On April 24, the “Syrian minister responsible for national reconciliation,” Ali Haidar, told *Reuters* that the Syrian government would focus on the opposition-held pocket in the city of Homs following the securing of areas around Damascus.¹⁸
 - On April 30, the Syrian army launched a “massive bombardment,” including airstrikes and artillery, against opposition-held areas of Homs Governorate between the cities of Hama and Homs. A reported 140 Syrian army strikes hit the town of Rastan and surrounding villages.¹⁹
3. Aleppo Governorate:
- On April 12, a car bomb exploded near the district council building in the opposition-held city of Azaz. No group claimed responsibility for the attack.²⁰

- On April 22, Syrian opposition forces, including fighters from Jaish al-Islam, arrived in Aleppo Governorate from the area of Eastern Qalamoun after a Russian-negotiated evacuation deal with the Syrian regime.²¹
- On April 29–30, missiles struck the Neirab Airbase near Aleppo. No group claimed responsibility for the attack, however suspicion fell on Israel.²²
- 4. Deir ez Zor Governorate:
 - On April 29, US-backed Syrian Democratic Forces (SDF) repelled a SARG attack against several villages located on the Euphrates River. US officials confirmed the attack. SARG and pro-regime forces reportedly captured the town of Jeneina.²³
- 5. Hama Governorate:
 - On April 29–30, missiles struck munitions warehouses at a Syrian military base near the city of Hama, killing at least 16 people, including Iranian forces. No group claimed responsibility for the attack, however suspicion fell on Israel.

Other Key Points:

- During the reporting period, the US-led coalition conducted airstrikes in the areas of al-Bukamal (Abu Kamal) and Shadaddi.²⁴
- During the reporting period, ISIS militants released a pledge of loyalty to ISIS leader Abu Bakr al-Baghdadi via their social media groups. Al-Baghdadi's whereabouts remain unknown.²⁵
- On April 25, the Russian military stated that Russia would supply the Syrian regime with a "new missile defense system," following targeted airstrikes by the US, France, and UK.²⁶

The main theaters of military operations during the reporting period in Iraq were:

1. Anbar Governorate:
 - On April 2, Iraqi Security Forces reportedly carried out an operation that targeted ISIS militants in the town of al-Rutbah. A reported 65 ISIS militants were killed in the operation.²⁷
 - On April 19, the Iraqi Air Force reported that it had carried out airstrikes against ISIS in areas near the border with Syria. The strikes reportedly took place in cooperation with the Syrian army.²⁸

2. Diyala Governorate:
 - On April 19, ISIS militants staged two attacks on Iraqi forces in the districts of Hawija and Khanaqin.²⁹
3. Baghdad Governorate:
 - On April 30, the Combined Joint Forces Land Component Command headquarters was “deactivated” at a ceremony in Baghdad. The ceremony signified the end of “major combat operations” against ISIS in Iraq.³⁰

Other Key Points:

- During the reporting period, the US-led coalition conducted airstrikes in the areas of Asad, Baghdad, Baiji, Huwajjah, Qaim, Qayyarah, and Tal Afar.³¹
- On April 20, Human Rights Watch (HRW) released a report accusing Iraqi officials of destroying possible war crime evidence after a room containing the bodies of reported ISIS members was burned down in Mosul.³²
- On April 22, ISIS spokesman Abu Hassan al-Muhajir released an audio recording calling on fighters to “redirect their ire toward the leaders of Arab nations in the region.” Al-Muhajir specifically mentioned upcoming elections in Iraq, calling “anyone who collaborates with the Iraqi government a legitimate target.”³³

The main theaters of military operations during the reporting period in Libya were:

1. Tripolitania:
 - On April 3, the Libyan Government of National Accord (LNA) announced a military operation to eliminate ISIS fighters near the city of Misrata.³⁴

Other Key Points:

- On April 11, international and Libyan media reported that General Khalifa Haftar, commander of the Libyan National Army (LNA), had been flown to Paris from Jordan after suffering a cerebral hemorrhage and losing consciousness. An LNA spokesman denied the reports, stating that the 75-year old was in good health.³⁵
- On April 25, a spokesman for LNA reported that General Haftar would be returning to Benghazi following two weeks of medical treatment in Paris. Haftar returned the following day.³⁶

Other significant political and military events during the reporting period:

- On April 30, twin ISIS suicide bombings struck near an Afghan security compound in Kabul, killing at least 25 people, including as least seven journalists.³⁷

Incident Reports: Syria

SHI 17-0224 UPDATE

Report Date: April 1, 2018

Site Name: Mari (Tell Hariri; تَلّ حريري ; ماري)

Date of Incident: Between November 13, 2017 and December 2, 2017

Location: Tell Hariri, Deir ez-Zor Governorate, Syria

Site Description: Mari is an ancient Mesopotamian city on the Euphrates River. Archaeological evidence from the site has been crucial for understanding Mesopotamian civilization during the Bronze Age. The city was founded in the early 3rd millennium BCE and prospered as an important stop along trade routes. The city grew throughout its history, eventually spreading over more than 14 hectares and rising 14.5 meters above the surrounding plain.

By approximately 1800 BCE, Mari's political control extended from Babylon in the south to the modern Turkish border in the north. The site was abandoned after its destruction 1759 BCE by the Babylonian king Hammurabi.³⁸ Mari is also known for an archive containing 50,000 clay tablets that were excavated at the site during the French Mandate period in the 1930s.³⁹ Until the current conflict, conservation efforts at the site were ongoing. Mari was nominated to the World Heritage Tentative List in 1999 and again as part of the Euphrates Valley Landscape in 2011.⁴⁰

Site Date: 2900–1759 BCE

Incident Summary: The Directorate-General of Antiquities and Museums (DGAM) in Syria published a new report about an archaeological site.

Incident Source and Description: On March 27, 2018 the Directorate-General of Antiquities and Museums (DGAM) in Syria published a report stating that DGAM archaeologists had conducted a field assessment of the site of Mari in Deir ez-Zor Governorate. According to the DGAM, the site has been heavily damaged by natural impacts and illegal excavations conducted by 'terrorists.'⁴¹ The DGAM also noted that the Palace of Zimri-Lim, located within the ancient site, suffered extensive damage. Photographs published with the report show a number of looting pits at the site, as well as damage to a modern structure protecting part of the palace. On April 19, 2018 *The Guardian*

³⁷ https://www.washingtonpost.com/world/suicide-bombings-in-kabul-kill-seven-including-a-journalist-rushing-to-the-scene/2018/04/30/88ae0af2-4c31-11e8-b725-92c89fe3ca4c_story.html

³⁸ Burns 1999: 126–129.

³⁹ <https://www.aaas.org/page/ancient-history-modern-destruction-assessing-status-syria-s-tentative-world-heritage-sites-7#Mari>

⁴⁰ <http://whc.unesco.org/en/tentativelists/1294/>; <http://whc.unesco.org/en/tentativelists/5702/>

⁴¹ <http://dgam.gov.sy/index.php?d=239&id=2386>

published an article reporting that most of the damage occurred under ISIS rule of the area, citing imagery showing extensive looting at the site in 2014.⁴²

However, as previously reported by ASOR CHI using DigitalGlobe satellite imagery, damage to the Palace of Zimri-Lim occurred between November 13, 2017 and December 2, 2017. During this time period, the central portion of the palace zone was damaged. The walls on the northern side of the central courtyard appear to have been mostly leveled, with a darkening of the soil and visible ash and discoloration on the remaining parts of the structure suggesting the damage was the result of an airstrike or explosives. There is also a crater visible in the soil just south of the covered area of the palace.

There is no visible evidence of increased illegal excavation in late 2017, although the walls of the palace are in poor condition as a result of a lack of maintenance.

See associated incident reports in this monthly report for other heritage sites that were damaged in Deir ez Zor Governorate: **ASOR CHI Incident Report SHI 18-0088** and **ASOR CHI Incident Report SHI 18-0089**.

For information on previous damage to the site of Mari, see **ASOR CHI Incident Reports SHI 14-0044** in **Weekly Report 9**, **SHI 14-0078** in **Weekly Report 15**, **SHI 14-0098** in **Weekly Report 19**, **SHI 17-0140** in the **August 2017 Monthly Report**, and **SHI 17-0208** in the **November 2017 Monthly Report**, and **SHI 17-0224** in the **December 2017 Monthly Report**.

Pattern: Site management; Military activity: explosives; Illegal excavation.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Mari, as well as the condition of other heritage sites located in regions subject to intense military activity.

SHI 18-0079

Report Date: April 3, 2018

Site Name: al-Kabir Mosque (مسجد الكبير)

Date of Incident: April 3, 2018

Location: Ariha, Idlib Governorate, Syria

Site Description: Al-Kabir Mosque is a Mamluk-era mosque in the town of Ariha. The current building largely dates to the reign of the Mamluk Sultan Baybars (r. 1260–77 CE), who had an earlier mosque replaced with the one in question. The minaret was commissioned during the reign of the Mamluk ruler al-Muzaffar Hajji (r. 1346–7). The mosque was renovated and expanded in the early 20th century.⁴³

Site Date: built ca. 1270 CE; expanded 1916

Incident Summary: Reported Russian airstrikes damaged a mosque.

Incident Source and Description: On April 3, 2018 a Private Twitter Account published a video showing the aftermath of reported Russian airstrikes on the town of Ariha near al-Kabir Mosque in the Old City neighborhood. The footage appears to indicate that the front entrance of the mosque beneath the minaret sustained damage, although the extent of the damage is currently unknown.

See associated incident reports in this monthly report for other heritage sites that were damaged in Idlib Governorate: **ASOR CHI Incident Report SHI 18-0080, SHI 18-0082, SHI 18-0083, SHI 18-0084, SHI 18-0086, and SHI 18-0097.**

Pattern: Military activity: explosives - airstrike.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of al-Kabir Mosque, as well as the condition of other heritage sites located in regions subject to military activity.

Site Date: Unknown

Incident Summary: Reported SARG airstrikes damaged a mosque.

Incident Source and Description: On April 5, 2018 the Syrian Network for Human Rights (SNHR) reported that SARG airstrikes damaged al-Rahman Mosque and a nearby school in al-Bara.⁴⁴ A photograph accompanying the report shows damage and debris in the mosque interior, including blown out windows. Qasioun News Agency published more extensive video footage showing damage to the mosque's interior and a school building adjacent to the mosque.⁴⁵ Most of the mosque damage appears to be material rather than structural.

Al-Rahman Mosque has been damaged on at least one prior occasion. Video footage published by Shaam News Network in March 2012 shows significant damage to the interior of the mosque, including a large hole in a wall.⁴⁶ This was reportedly the result of shelling by SARG forces.

Report Date: April 9, 2018

Site Name: al-Kabir Mosque (جامع الكبير)

Date of Incident: April 7, 2018

Location: al-Bab, Aleppo Governorate, Syria

Site Description: Mosque

Site Date: Early 20th century CE or earlier

Incident Summary: A car bomb damaged a mosque.

Incident Source and Description: On April 7, 2018 Euphrates Post reported that a car bomb damaged al-Kabir Mosque in al-Bab.⁴⁷ Video footage released by SMART News Agency indicates that the car bomb detonated outside of a fuel shop located in front of the mosque, resulting in damage to the mosque and surrounding shops.⁴⁸ The explosion killed at least 10 civilians.⁴⁹ No group has claimed responsibility for the attack.

Initial photographs and video from the site of the attack suggest that the wall of the mosque was damaged by shrapnel and stained by the soot from the adjacent fire. A series of makeshift structures between the explosion and the mosque appear to have partially shielded the mosque from the blast. DigitalGlobe satellite imagery from April 15, 2018 does not show any significant damage to the mosque.

See associated incident reports in this monthly report for other heritage sites that were damaged in Aleppo Governorate: **ASOR CHI Incident Report SHI 18-0090** and **ASOR CHI Incident Report 18-0092**.

SHI 18-0083

Report Date: April 17, 2018

Site Name: Ebla (Tell Mardikh; تل مردیخ)

Date of Incident: Ongoing

Location: Idlib Governorate, Syria

Site Description: Ebla (Tell Mardikh) is located 60 km southwest of Aleppo in Idlib Governorate. Occupied from the Early Bronze Age (ca. 3500 BCE) until the 7th century CE, the site consists of a central high mound (the “Acropolis”) surrounded by a lower mound comprising the Bronze Age lower town, which is in turn encircled by the remains of a large Middle Bronze Age earth and stone fortification wall and rampart with four gates.⁵¹ Ebla is best known for the discovery of a large Early Bronze Age palace, Palace G, which was destroyed by fire in antiquity. This destruction has been variously attributed to the Akkadian king Sargon, his grandson king Naram-Sin, and the rival city-state of Mari located on the Euphrates River.⁵² Excavations in the palace recovered an important archive of more than 5,000 complete and fragmentary administrative documents known as the ‘Ebla Tablets’.⁵³ The Bronze Age city was destroyed and rebuilt a number of times, until its final destruction ca. 1600 BCE by the Hittites.⁵⁴ Ebla never recovered, though small occupations continued to appear at the site until its final abandonment in the 7th-century CE.⁵⁵ The Italian Archaeological Expedition of the University ‘La Sapienza’ under the direction of Paolo Matthiae began excavating the site in 1964 and continued until 2011.⁵⁶

Site Date: c. 3500 BCE - 7th century CE

Incident Summary: Satellite imagery reveals ongoing damage due to illegal excavation and military occupation.

Incident Source and Description: DigitalGlobe satellite imagery shows ongoing damage to archaeological material at the site of Ebla. Illegal excavation at the site has been ongoing since before May 31, 2012. The majority of the illegal excavation is centered on the acropolis area of the mound primarily around the Early and Middle Bronze Age Palaces. Other looting pits are visible around and within exposed areas from previous archaeological excavations. Since June 30, 2016 illegal excavations have increased, specifically on the southwestern side of the acropolis near the Resheph Temple and Early Bronze Age Palace.

Between February 21, 2017 and April 13, 2018 the remains of the Resheph Temple and the Early Bronze Age Palace disappeared. In addition to these illegal excavations there was an expansion to the bulldozing at the base of the acropolis mound on the northwestern corner close to the Middle Bronze Age Palace. The northwestern corner of the Palace of the Crown Prince has also been

⁵⁶ Matthiae, Paolo (2013), p. 37.

disturbed due to illegal excavations. Bulldozing is also seen around the northern corner of the mound near the Aleppo Gate.

Illegal excavations are not the only cause of the ongoing damage to the site of Ebla. The site was damaged by the construction of military occupation seen in embankments, bunkers, and impact craters from airstrikes. Between February 21, 2017 and April 13, 2018 there is increased damage to several parts of the tell. New earthworks have been constructed on the southeastern area of the mound and in the northeastern corner near the Euphrates Gate. Additional trenches have been dug around the mound for military vehicles. Satellite imagery has also shown multiple impact craters on the mound, often located close to a military trench or vehicle.

SHI 18-0085**Report Date:** April 20, 2018**Site Name:** Ali Bin Abi Talib Mosque (مسجد علي بن أبي طالب)**Date of Incident:** April 20, 2018**Location:** Tadamon, Damascus, Damascus Governorate, Syria**Site Description:** Mosque**Site Date:** Unknown**Incident Summary:** SARG forces captured a mosque.

Incident Source and Description: On April 20, 2018 a Private Twitter Account reported that SARG forces entered Tadamon district in Rif Dimashq Governorate, capturing Ali Bin Abi Talib Mosque from opposition forces in the area. Photographs show alleged SARG forces in the mosque interior, which shows damage and debris. One wall of the mosque has been sandbagged.

DigitalGlobe satellite imagery indicates that Ali Bin Abi Talib Mosque was initially damaged between April 9, 2012 and August 2, 2012. At that time, there was visible damage from heavy shelling in the surrounding area and visible damage to the roof of the mosque. The majority of the infrastructure around the mosque was destroyed between September 25, 2012 and November 6, 2012. There was an increase in the number of holes in the roof of Ali Bin Abi Talib Mosque between November 6, 2012 and December 23, 2014. The minaret also collapsed during that time frame. Recent DigitalGlobe satellite imagery shows that all the buildings within the neighborhood around the mosque were also destroyed. There is no recent visible damage to the mosque.

See associated incident reports in this monthly report for other heritage sites that were damaged in Damascus Governorate: **ASOR CHI Incident Report SHI 18-0087**, **SHI 18-0095**, and **SHI 18-0096**.

Report Date: April 22, 2018

Site Name: Banabel Column (بنابل)

Date of Incident: March 17–April 22, 2018

Location: Banabel, Idlib Governorate, Syria

Site Description: The village of Banabel contains the ruins of what may be the earliest residences of the Roman period in North Central Syria. According to H.C. Butler, the ruins include three well-preserved houses, a small tower, and several other miscellaneous buildings, all dating to the 2nd century CE.⁵⁹ The most conspicuous of these is a large column around 30 meters high that stands to the southwest of the rest of the site. Crosby theorizes this structure was original a bicolumnar funerary monument.⁶⁰

Site Date: ca. 2nd century CE

Incident Summary: Alleged Hayat Tahrir al-Sham militants destroyed a Roman column.

Incident Source and Description: On April 22, 2018 a Private Twitter Account reported that Hayat Tahrir al-Sham (HTS) militants destroyed an ancient Roman column in the town of Banabel. On April 23, 2018 Aleppo Archaeology published a video on Facebook showing the moment the column collapsed.⁶¹

DigitalGlobe satellite imagery from April 24, 2018 confirms the column was destroyed between March 17 and April 24, 2018.

SHI 18-0088

Report Date: April 23, 2018

Site Name: Ein Ali Shrine

Date of Incident: Between November 10, 2017 and April 2018

Location: Ein Ali, Deir ez-Zor Governorate, Syria

Site Description: Shrine

Site Date: Modern

Incident Summary: An organization built a shrine at a historic site.

Incident Source and Description: On April 23, 2018 Euphrates Post reported that the organization known as the Authority of the Shrines of the “People of the House,” which is allegedly supported by Iran, built a shrine at the spring of Sayyid Ali bin Abi Talib.⁶³ A pair of before-and-after photographs in the report imply that the earlier remains, including a standing tower, were damaged or destroyed during the construction of the shrine. However, there is nothing in the photos themselves that definitively shows that the construction of the shrine damaged any remains.

Based on DigitalGlobe satellite imagery, construction of the shrine began between November 10, 2017 and December 2, 2017, as evidenced by numerous bulldozer scars at the location. Construction continues to the most recently available image from December 31, 2017. The shrine’s location is 155 meters southeast from the historic tower. However, the tower and site were damaged between March 23, 2013 and June 5, 2016, prior to the start of construction of the shrine.

See associated incident reports in this monthly report for other heritage sites that were damaged in Deir ez Zor Governorate: **ASOR CHI Incident Report SHI 17-0224 UPDATE** and **ASOR CHI Incident Report SHI 18-0089**.

For more information on the site of Ein Ali and the tower, see **ASOR CHI Incident Report SHI 18-0089**.

Pattern: Development disturbances.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of the Ein Ali Shrine, as well as the condition of other heritage sites located in regions subject reconstruction and clean-up.

SHI 18-0089

Report Date: April 24, 2018

Site Name: Tell Ein Ali Tower

Date of Incident: Between March 23, 2013 and September 28, 2016

Location: Tell Ein Ali, Deir ez-Zor Governorate, Syria

Site Description: An ancient tower in Deir ez Zor Governorate.

Site Date: Unknown

Incident Summary: A historic tower was destroyed.

Incident Source and Description: Recently released DigitalGlobe satellite imagery indicates that the tower at the southeastern part of Tell Ein Ali was destroyed between March 20, 2013 and September 28, 2016. Illegal excavations along the tell's western slope, as well as bulldozing north of the tell, also occurred during this time period. The perpetrators of this destruction are not known.

The Euphrates Post recently implied that the construction of a shrine at a nearby natural spring was connected to the destruction of the tower.⁶⁴ However, DigitalGlobe satellite imagery demonstrates that at least 2 years separate the destruction of the tower from the construction of the shrine, which is located 155 meters to the southeast.

See associated incident reports in this monthly report for other heritage sites that were damaged in Deir ez Zor Governorate: **ASOR CHI Incident Report SHI 17-0224 UPDATE** and **ASOR CHI Incident Report SHI 18-0088**.

Pattern: Military activity; intentional destruction; Illegal excavation.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of the Tell Ein Ali Tower, as well as the condition of other heritage sites located in regions subject reconstruction and clean-up.

SHI 18-0090

Report Date: April 24, 2018

Site Name: Cyrrhus (Nebi Hourri; نبي حوري)

Date of Incident: Between April 15, 2018 and April 24, 2018

Location: Nebi Hourri, Aleppo Governorate, Syria

Site Description: Cyrrhus was founded ca. 330 BCE by the Hellenistic general Seleucus Nicator. The city remained in Seleucid hands until the 1st century BCE, when it was captured by Armenia during the reign of Tigranes II. He was later defeated and Cyrrhus, along with much of Syria, was annexed to Rome. Cyrrhus was captured at least twice by the Sasanians in the 3rd century CE, causing the city to fall into decline. It was captured by the Arabs in 637. By the 13th century, Cyrrhus appears to have been largely deserted.⁶⁵ Visible remains include a large theater (built ca. 150 CE), a Byzantine-era citadel, two Roman-era bridges, a hexagonal mausoleum, a church, a basilica and several gateways.⁶⁶

Site Date: ca. 330 BCE–1050 CE

Incident Summary: Satellite imagery shows evidence of illegal excavation at an archaeological site.

Incident Source and Description: DigitalGlobe satellite imagery from April 15 and 24, 2018 shows at least five new instances of illegal excavation at the archaeological site of Cyrrhus. The illegal excavation pits are located southeast of the theater.

See associated incident reports in this monthly report for other heritage sites that were damaged in Aleppo Governorate: **ASOR CHI Incident Report SHI 18-0081** and **ASOR CHI Incident Report SHI 18-0092**.

For more information on previous damage to the site of Cyrrhus, see **ASOR CHI Incident Report SHI 18-0033** in the **January 2018 Monthly Report**.

Pattern: Illegal excavation.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Cyrrhus, as well as the condition of other heritage sites located in regions subject to illegal excavation.

SHI 18-0091

Report Date: April 29, 2018

Site Name: Bosra Roman Theater (المسرح الروماني ببصرى)

Date of Incident: April 29, 2018

Location: Bosra, Daraa Governorate, Syria

Site Description: The Roman Theater at Bosra was built in the mid-2nd century CE of locally available black basalt. The theater is one of the largest and most intact in the Roman world, with seating for 15,000 people.⁶⁷ Ross Burns writes, “the Ayyubid fortifications fit like a jacket around the half-circle of the Roman building, with major towers at the northeast and northwest corners, a central bastion along the diameter (north) and give subsidiary towers around the arc of the semi-circle.”⁶⁸ The Ayyubid upper ramparts now house, on the upper terrace, a collection of sculptures from the Roman period as well as Roman and Arabic inscriptions. The southwestern tower houses an ethnographic collection of artifacts.⁶⁹

Site Date: Roman, Ayyubid

Incident Summary: Photographs reveal flooding in the Roman Theater in Bosra.

Incident Source and Description: On April 29, 2018 Aleppo Archaeology published photographs showing flooding in the orchestra of the Roman Theater at Bosra.⁷⁰ The flood waters rose to cover much of the stage and several rows of seats.

A photograph published by the Facebook page Syrian Archaeological Sites Under the Crisis shows flooding around the base of the Ayyubid-era ramparts surrounding the Roman theater.⁷¹

Pattern: Natural impacts.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of the Bosra Roman Theater, as well as the condition of other heritage sites located in regions subject to natural impacts.

Report Date: April 30, 2018

Site Name: Maryr Seydo Cemetery (مقبرة الشهيد سيدو)

Date of Incident: Between March 13, 2018 and April 24, 2018

Location: Kafr Safra, Afrin District, Aleppo Governorate, Syria

Site Description: Cemetery for Kurdish fighters in the Afrin region.

Site Date: Unknown

Incident Summary: A Kurdish cemetery was damaged.

Incident Source and Description: On April 30, 2018 a Private Twitter Account published a photograph of damage to Martyr Seydo Cemetery in Kafr Safra. The Private Twitter Account alleged that the damage to the cemetery was the result of attacks by Turkish forces. Photographs show that headstones have been smashed and removed, and there is rubble and possibly litter amongst the graves. Recently released DigitalGlobe satellite imagery shows damage to the cemetery occurred between January 29, 2018 and March 13, 2018. The cause of damage is not clear. DigitalGlobe satellite imagery showed that additional damage to the cemetery also occurred between March 13 and April 24, 2018.

See associated incident reports in this monthly report for other heritage sites that were damaged in Aleppo Governorate: **ASOR CHI Incident Report SHI 18-0081** and **ASOR CHI Incident Report SHI 18-0090**.

Pattern: Military activity: intentional destruction.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Martyr Seydo Cemetery, as well as the condition of other heritage sites located in regions subject to military activity.

Damage Report on Banabel Column

24 April, 2018

Banabel Column

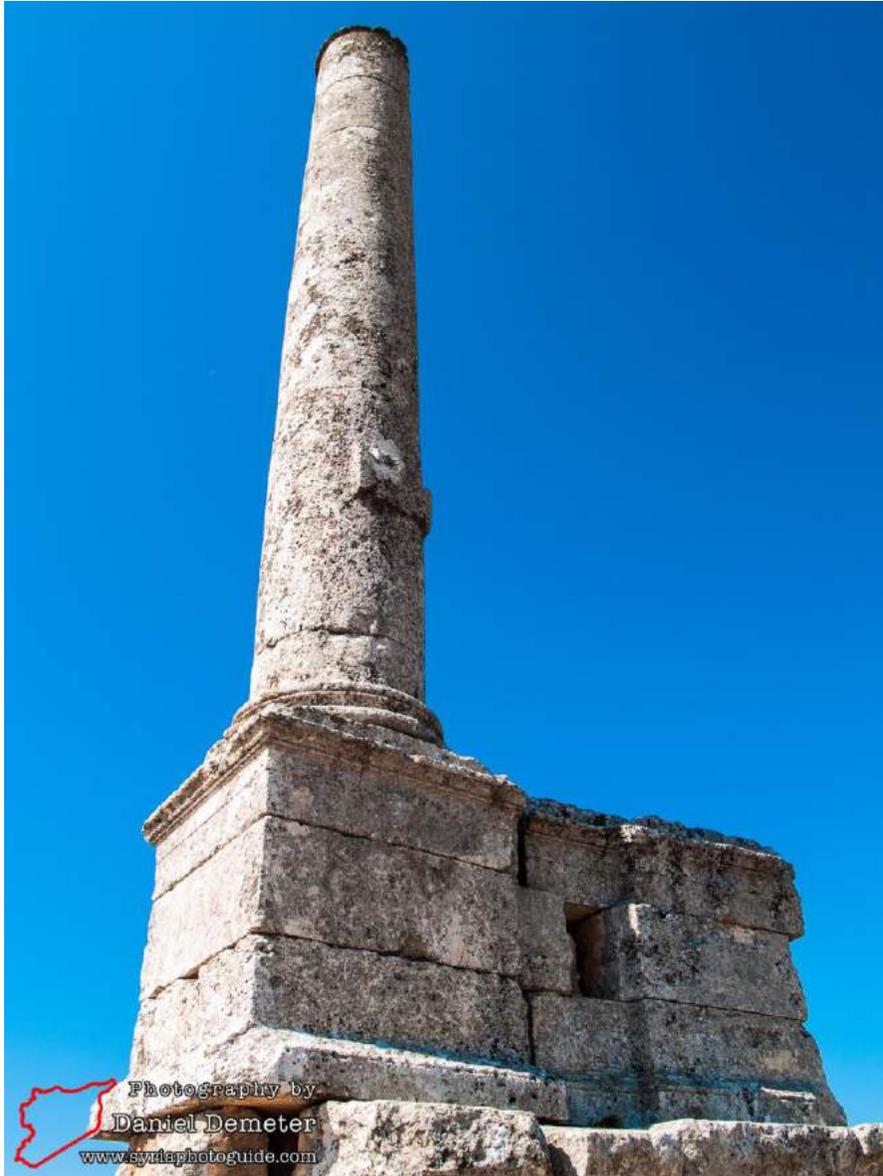

Jabal Al-Summaq (Or Jabal Sharqi), located 20 km north of Idlib city and 8 km east of Kafr Takharim, is home to nine villages of a mix of Druze and Sunni populations: Banabel, Qalb Lozeh, Bshendelti, Bshendlaya, Kafr Maris, Teltita, Hallah, Koko, and Kafr Kila” with a total population of about 15 thousand in all villages.

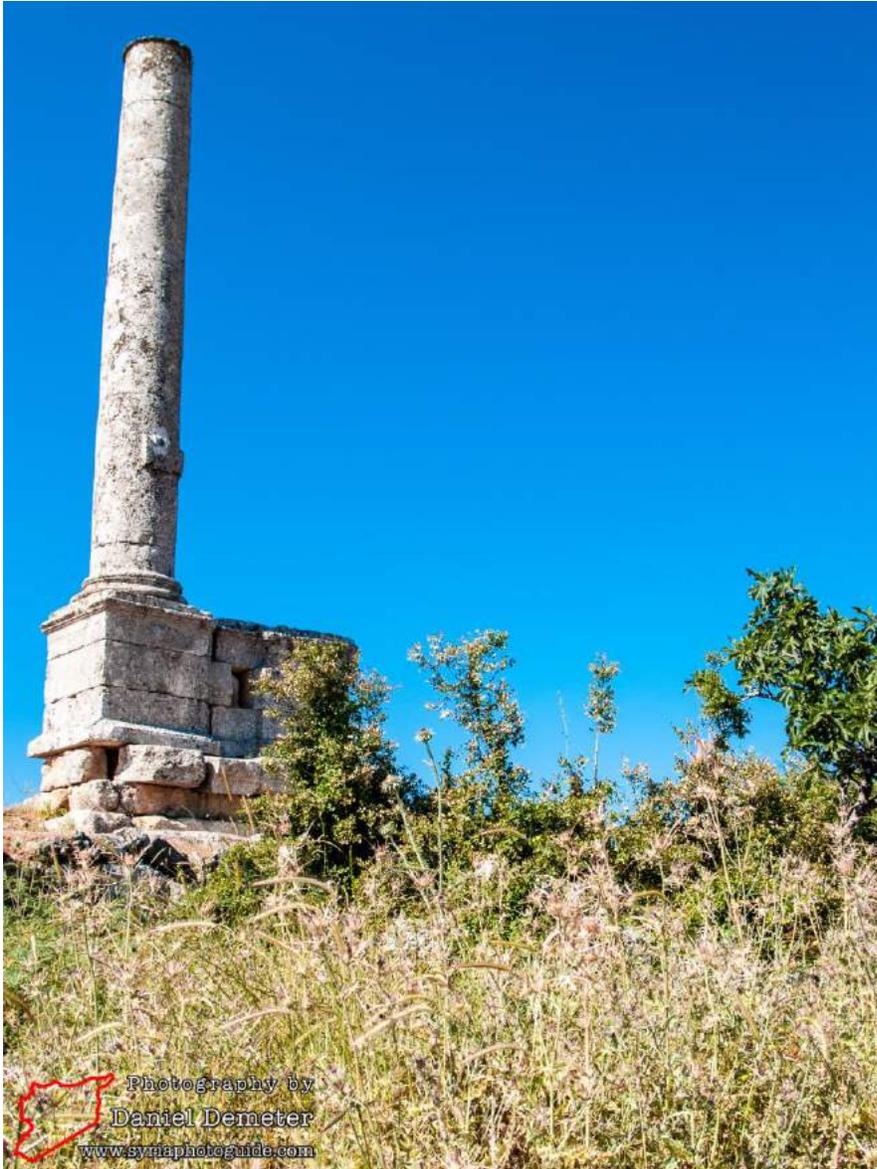

Qalb Lozeh is 13 km away from Kafr Takharim and 11 km from Qurqanya, while Banabel Village is closer to Harem which is 10 km away. The longest distance between any two villages on the mountain is no greater than 5km, while many others are 1 km or less apart.

Jabal Al-Summaq residents grow olive trees on the rocky mountain, though few and far in between, and raise cattle like goats, sheep, and cows. The mountain has more rocky unclaimed land than reclaimed ones.

On Tuesday, 4/24/2018, Cultural Heritage Center/TDA site monitors conducted a field survey of Banabel Village and documented the damage to the Banabel Column. The site and column were destroyed by looters in an effort to uncover would be treasure they assumed to be buried treasure underneath the site. The looters are believed to be members of one of the local brigades affiliated with Hay’at Tahrir Al Asham (HTS).

Site Monitoring Report Al-Qasr

11 April 2018

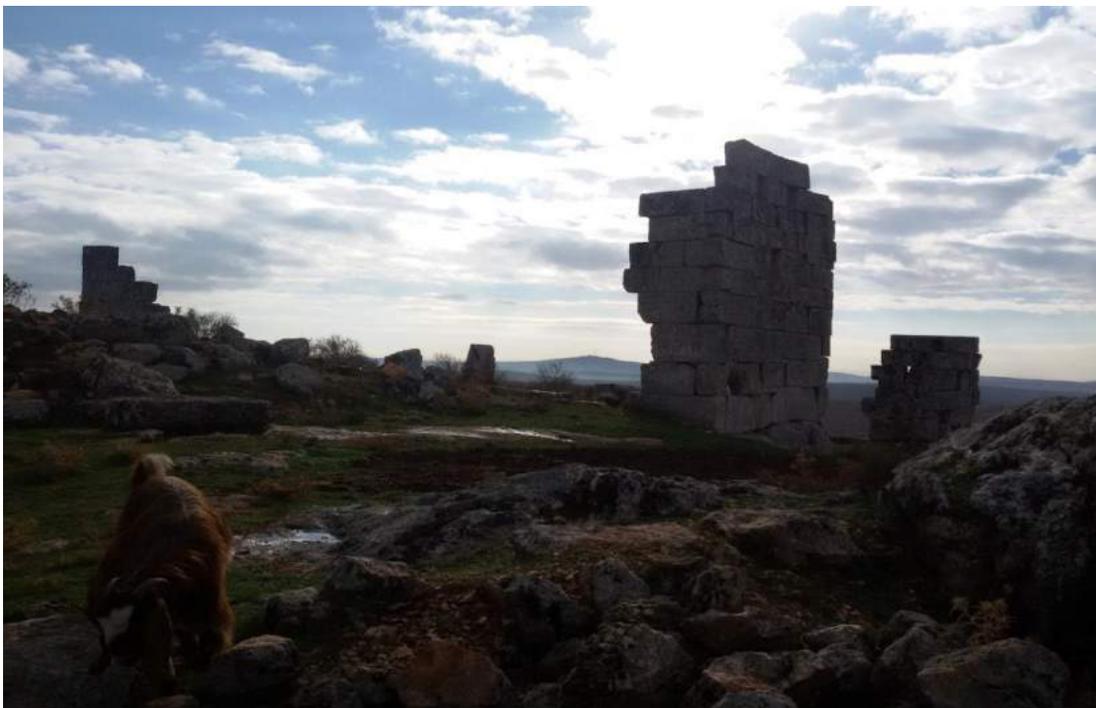

Located southeast of the road connecting Ain Larose and Kansafra, Al-Qasr is one of the most prominent archaeological sites in the village of Ain Larose in Jabal Al-Zawiyah.

It was built in the fifth century A.D. (Byzantine period) and is comprised of several residential buildings sitting on a rocky hill that overlooks farmlands in all directions.

The palace from its south side and the road that runs to Ain Arouz

The southwest side of the site

The southwest side of the site

There are a number of burial sites carved in the bedrock inside the homes.

A group of unexcavated tombs

There are also several water wells.

The southern side and illegal excavations

Oil and wine presses and can be found on the site.

The northeast side of the site

Numerous looting pits and other signs of illicit digging have been noted at various points on the site.

The northern side with evidence of looting

The northern side shows recent looting activity

Illegal excavation as seen from the east

Overall the site appears to be in relatively good condition. There is evidence of some recent digging in some areas of the site indicating occasional looting activity. The pits/holes in the ground are 2X2m and 1m deep from illicit digging. There is no evidence of significant destruction, demolition, or dredging done on the site.

Site Monitoring Report Tell Al-Tah (South)

25 March 2018

The tell is located south of Al-Tah village along the road leading to Khan Sheikhoun. The tell is 500m long and 485m wide. Unlike other nearby hills, it has a modest elevation of about 20m. With the onset of the Syrian uprising and the state of anarchy that prevailed in the region, opportunists used heavy machinery for digging/looting and dredging activity on the site, leaving holes up to 12m deep, disturbing the soil layers. Tell Al-Tah (South) is registered as an archaeological site and protected by the Ma'arrat Al-Numan Department of Antiquities.

A team from the Syrian Cultural Heritage Center and TDA-HPI, visited the site in June 2017 and took photos of visible damage and violations. A huge press made of basalt stone was also found.

Incident Reports: Libya

LHI 18-0002 UPDATE

Report Date: April 16, 2018

Site Name: Ghadames (غدامس)

Date of Incident: Ongoing

Location: Tripolitania, Libya

Site Description: The Old Town of Ghadames is one of five Libyan sites inscribed on the UNESCO World Heritage List (1986). Consisting of a tightly clustered series of mud-brick houses in a palm oasis that served as a key nexus in the trans-Saharan trade routes, Ghadames is an outstanding example of a Saharan oasis town.⁷⁷

Ghadames is first recorded in history in connection with a Roman expedition to conquer the region in the late 1st century BCE.⁷⁸ Pottery sherds and Latin inscriptions discovered in and around the town indicate a Roman garrison was stationed there until the 3rd century CE. In 667, Ghadames, by then a Christian town, was conquered by the Arabs under Uqba ibn al-Nafi.

Traditional Berber buildings in Ghadames were constructed using locally available materials, including mud, stone, lime, palm trees, and straw.⁷⁹ Mud-brick walls were built on stone foundations and braced with palm trunks, with lime used to whitewash walls. The Old Town contains around 20 mosques and numerous religious schools (zawiya) within its six neighborhoods.⁸⁰

Site Date: ca. 1st century BCE to present

Incident Summary: Natural impacts and lack of maintenance caused the collapse of historic buildings.

Incident Source and Description: Following a complaint from the Department of Antiquities (DoA) in Ghadames regarding collapse in the Old Town in December 2017, the DoA in Tripoli dispatched a delegation to the site to document the aftermath of the storms.⁸¹ This effort is part of a larger DoA project to prepare comprehensive reports on the status of each of the five UNESCO World Heritage sites in Libya, all of which are currently listed on the World Heritage List in Danger. Mahmoud Hadia and Safa al-Hagi of the archives team in Tripoli documented damage for their internal report, and provided ASOR CHI with photographs of the damage to the Old Town of Ghadames, including collapsed mud-brick structures weakened by rains and lack of maintenance.

⁸⁰ <https://archnet.org/sites/3550>

⁸¹ <https://www.218tv.net/الإهمال-يدق-ناقوس-الخطر-حول-الأثار-الل/>

Since the visit of the delegation from Tripoli at the end of 2017, several additional buildings have collapsed. According to the DoA, moisture that penetrated the walls during the heavy rains caused the mudbrick walls to swell. As they dried out, these walls began to gradually buckle, resulting in significant structural damage.

DoA employees in Ghadames have continued to document these ongoing collapses, and report that they expect more damage in the future as temperatures continue to rise in Ghadames during the transition from spring to summer. Hassan Hammoudeh has been directly in contact with ASOR CHI, and has provided descriptions of the most recent damage. Hammoudeh identified five previously unrecorded instances of collapse. He reports that neither the DoA nor the Historic Cities Authority, which is nominally in charge of the site, have been able to provide assistance due to the lack of an operating budget. The newly reported collapses occurred at five locations, namely four residential buildings (Location 1, 3-5) and one disused Sufi school (Location 2).

For information on previous damage to the site of Ghadames, see **ASOR CHI Incident Report LHI 18-0002** in the **January 2018 Monthly Report**.

Pattern: Natural impacts; Site management.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of the Old Town of Ghadames, as well as the condition of other heritage sites located in regions subject to natural impacts.

LHI 18-0016 UPDATE

Report Date: April 2, 2018

Site Name: Sabha Castle (Fort Elena; Fortezza Margherita; قلعة سبها)

Date of Incident: March 31, 2018

Location: Sabha, Fezzan, Libya

Site Description: Sabha Castle was originally constructed ca. 1870 during the Ottoman Period. It was expanded in the 1930s during the Italian Colonial era.⁸²

Site Date: Built 1870 CE, restored during Italian Colonial era.

Incident Summary: Ongoing fighting in Sabha damaged a historic castle.

Incident Source and Description: On April 1, 2018 multiple news outlets reported that ongoing fighting in the city of Sabha between the forces of the Government of National Accord-aligned 6th Brigade (stationed in Sabha Castle) and armed tribal groups damaged the castle for the second time in less than one month.⁸³ Recent shelling caused the partial collapse of a watchtower on the western side of the castle and a section of the wall on the right side of the main entrance on the southern side.

For information on previous damage to the site of Sabha Castle, see **ASOR CHI Incident Report LHI 18-0016** in the **March 2018 Monthly Report**.

Pattern: Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Sabha Castle, as well as the condition of other heritage sites located in regions subject to military activity.

LHI 18-0019

Report Date: April 30, 2018

Site Name: Anglican Church of Christ the King (Church of Santa Maria degli Angeli)

Date of Incident: April 16, 2018

Location: Tripoli, Tripolitania, Libya

Site Description: Located in the Old City of Tripoli, the Roman Catholic Church of Santa Maria degli Angeli was founded around 1645 CE.⁸⁴ In 1970, the church was ordered closed by Muammar Qaddafi. It reopened in 2007 and was transferred to the Anglican community. The church is now known as the Anglican Church of Christ the King.

Site Date: 1645 CE

Incident Summary: Thieves allegedly stole bells from a church.

Incident Source and Description: On April 16, 2018 Asharq al-Awsat reported that thieves stole two copper bells from the historic Church of Santa Maria (Anglican Church of Christ the King) in Tripoli and sold them for scrap.⁸⁵ The Tripoli Security Directorate (TSD) arrested two people after they admitted to stealing two bells from the church and selling them to a scrap merchant. One of the bells was subsequently recovered but the other remains missing.

Pattern: Theft.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of the Church of Christ the King, as well as the condition of other heritage sites located in regions subject to theft and illegal excavation.

LHI 18-0020

Report Date: April 16, 2018

Site Name: Storeroom of Sidi Khrebish (Berenice)

Date of Incident: April 15, 2018

Location: Berenice, Benghazi, Cyrenaica, Libya

Site Description: This storeroom was built on the archaeological site of Sidi Khrebish/Berenice in downtown Benghazi to protect artifacts discovered on site. It is a simple masonry structure with a sheet metal roof.

Site Date: 20th century CE

Incident Summary: A fire broke out in a storeroom containing artifacts.

Incident Source and Description: On April 16, 2018 a representative of the Libyan Department of Antiquities (DoA) in Benghazi reported via Facebook that a fire had broken out in the storeroom of Sidi Khrebish. Fortunately, in recent months, DoA staff had transported most of the artifacts from this storeroom to a more secure location. Nevertheless, enough flammable debris remained in storage and caught fire. The cause of the fire remains under investigation, and it may have damaged several mosaic panels that had not yet been removed from the storeroom.

Pattern: Natural impacts.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Sidi Khrebish/Berenice, and reports of the conditions in museums and storerooms around the country.

Satellite Imagery and Geospatial Analysis

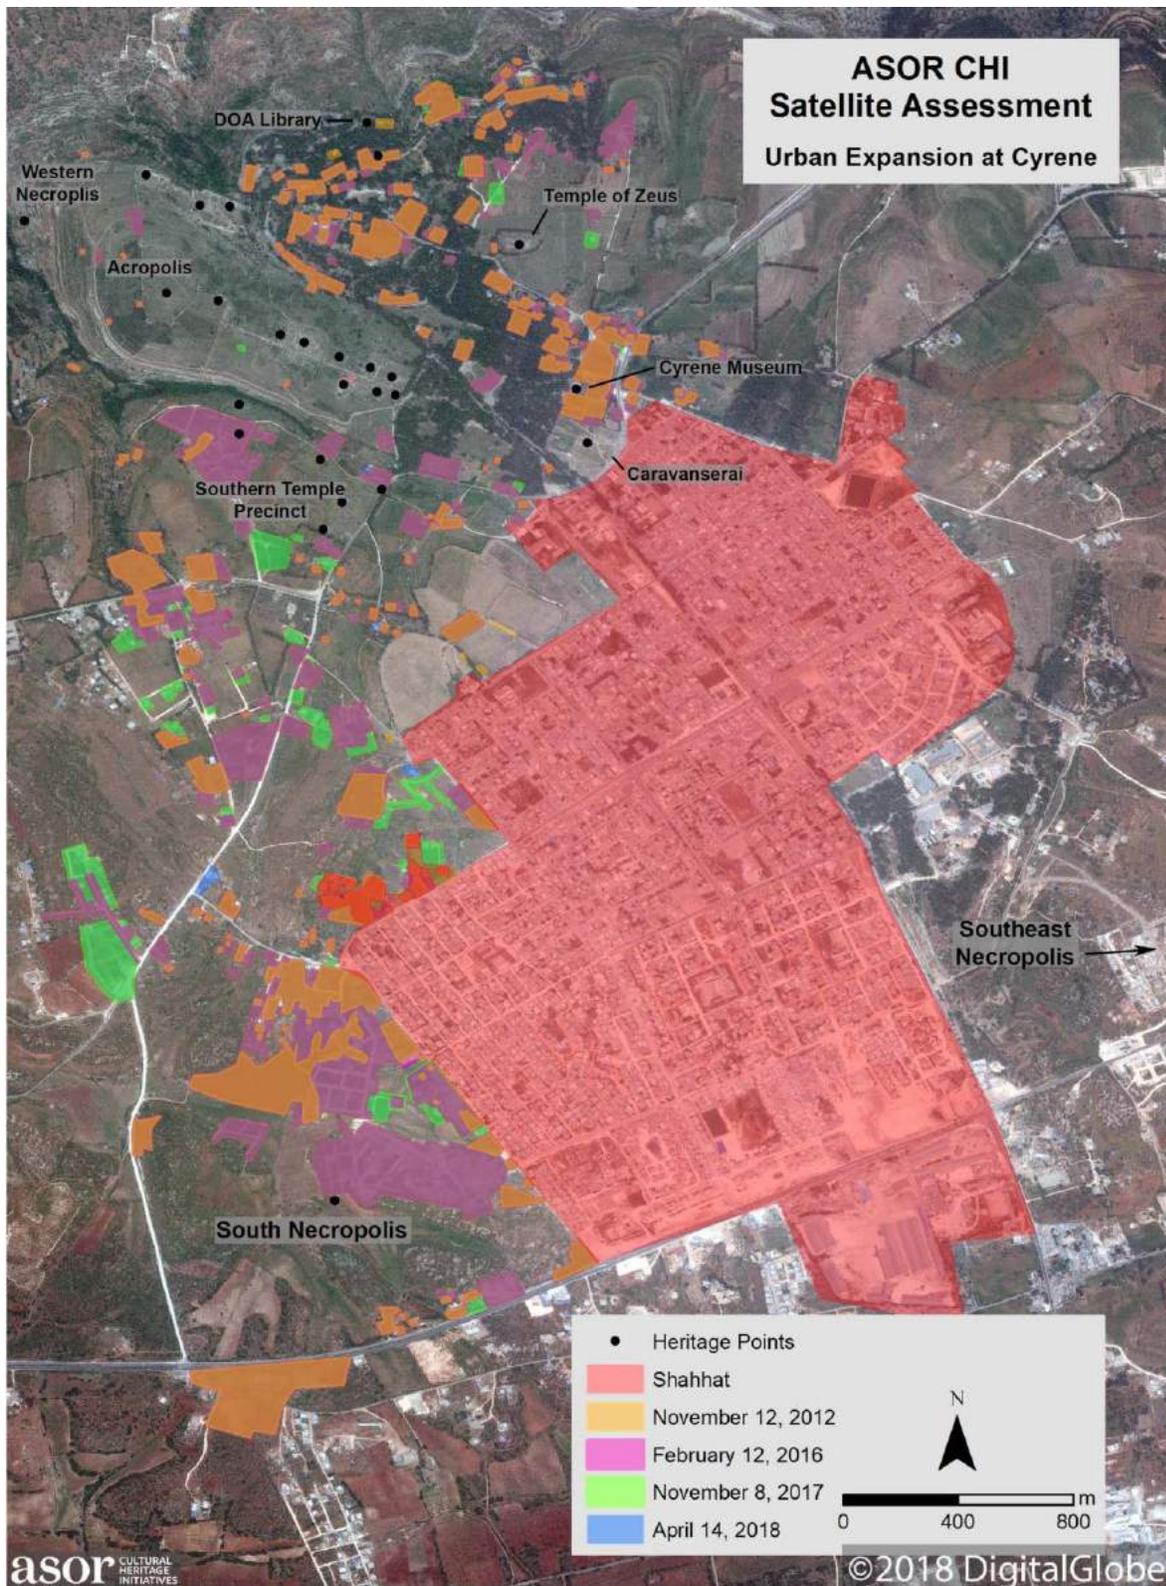

Cyrene was founded ca. 630 BCE by Greek colonists from the island of Thera. In the 1st century BCE, Cyrene became a Roman province.⁸⁶ By 410 CE, the city was abandoned as a result of frequent barbarian raids. The site consists of the remains of a number of temples dedicated to Isis, Serapis, Apollo, Demeter, Zeus, and other deities, as well as many villas, baths, markets, and administrative buildings. Cyrene is one of the five Libyan sites inscribed on the UNESCO World Heritage list and is one of the best preserved Greco-Roman cities of North Africa.⁸⁷ The archaeological site is located in the area surrounding and underneath the modern city of Shahat.

Despite the importance of the archaeological site, the ASOR CHI Geospatial Team has found that Cyrene is suffering from on-going urban encroachment on much of the site. ASOR CHI has previously reported on some of this urban encroachment within the area of Wadi Belgadir in **ASOR CHI Incident Report LHI 17-0031** in **October 2017 Monthly Report**. In order to better understand the extent of the encroachment, four satellite images were used to assess urban expansion and development overtime: November 12, 2012, February 12, 2016, November 8, 2017, and the most recently available image from April 14, 2018. In each image, modern buildings, construction, and bulldozing within the archaeological area were outlined. In this way, we were able to determine which time periods saw the largest amount of urban encroachment and which parts of the archaeological site have been most impacted by this growth. The extent of urban encroachment in each image can be seen in the map below.

The Controller of Antiquities for the Libyan Department of Antiquities (DoA) in Shahat, reports that since late 2017, DoA has been able to confront the issue of illegal urban encroachment more directly with the help of municipal law enforcement. A recent workshop in Shahat bringing together judges, law enforcement, and archaeologists to discuss this problem has resulted in better application of the existing laws protecting Libyan heritage. The municipality of Shahat has opened cases against residents living in the zones of urban encroachment detailed in the following maps, and the police have delivered summons for them to report to court. While the punishment for these crimes may not exceed a modest fine, this preliminary judicial action appears to have slowed the rate of illegal construction considerably in recent months. As seen in our time-stamped geospatial analysis of urban encroachment, these efforts seem to have been successful as there has been very little recent urban encroachment.

⁸⁶ P. Kenrick (2013) *Cyrenaica: Libya Archaeological Guides*. The Society for Libyan Studies. London: Silphium Books. 148 ff.

⁸⁷ <https://whc.unesco.org/en/list/190>

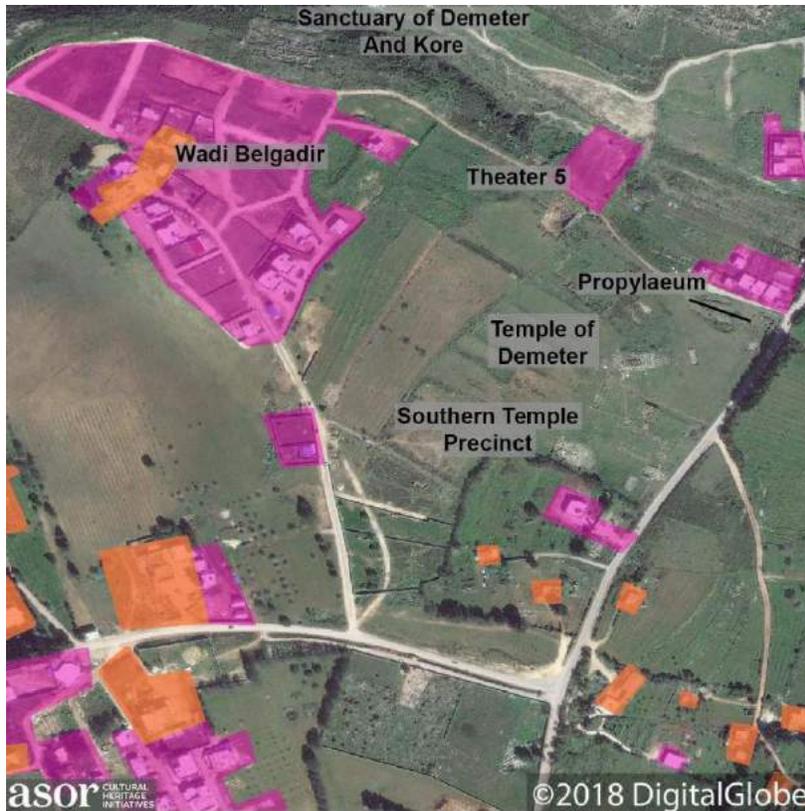

Overview of urban expansion at Cyrene, and the location of the modern city Shahhat, since November 12, 2012. The most dramatic urban expansion has been at the South Necropolis and the Southern Temple Precinct (ASOR CHI/Imagery courtesy of DigitalGlobe; April 14, 2018)

Wadi Belgadir and Southern Temple Precinct

As can be seen in the map above, the most expansive period of urban encroachment at Cyrene occurred between November 12, 2012 and February 12, 2016. This was also the largest gap in time that the ASOR CHI geospatial team was able to analyze as a result of the lack of available imagery. Only mosaicked images prior to 2016 were available. These images are difficult to use in longitudinal analyses due to the unclear nature of the date the image was taken. Therefore, the earliest available image is the only mosaic used in this analysis in order to avoid inaccuracy. During this time period, much of the archaeological area of Wadi Belgadir was severely encroached upon by the creation of a modern subdivision. This encroachment also compromised other archaeological features in the Southern Temple Precinct, such as the Propylaeum. There were only minor increases in development within this area between February 12, 2016 and November 8, 2017 and this expansion does not appear to directly affect any archaeological remains. This is likely the result of the injunction on new development issued by the Department of Antiquities in November 2017. There was no visible urban development between November 8, 2017 and April 14, 2018.

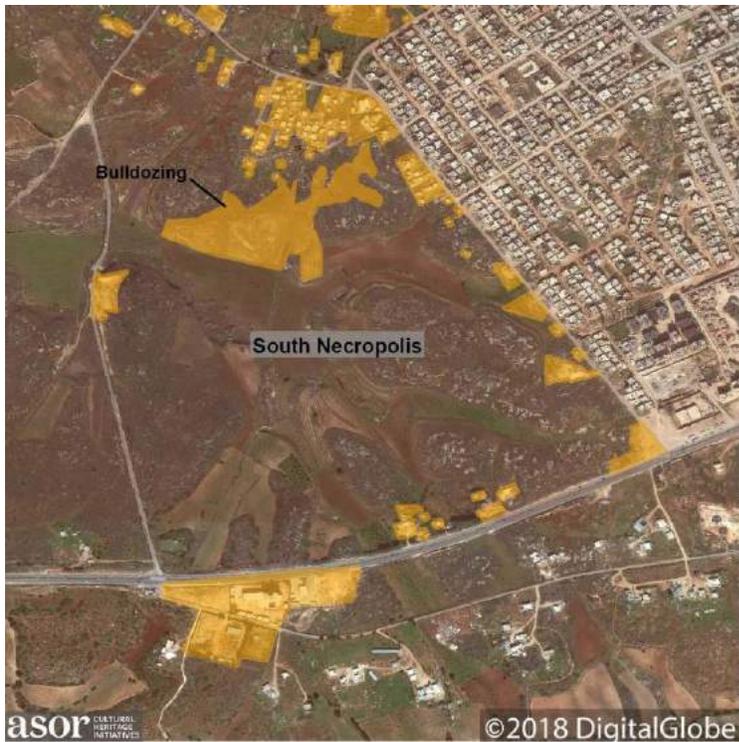

The area of the southern temple precinct prior to increased urban expansion, with areas of urban development shown in orange (Imagery courtesy of DigitalGlobe; November 12, 2012)

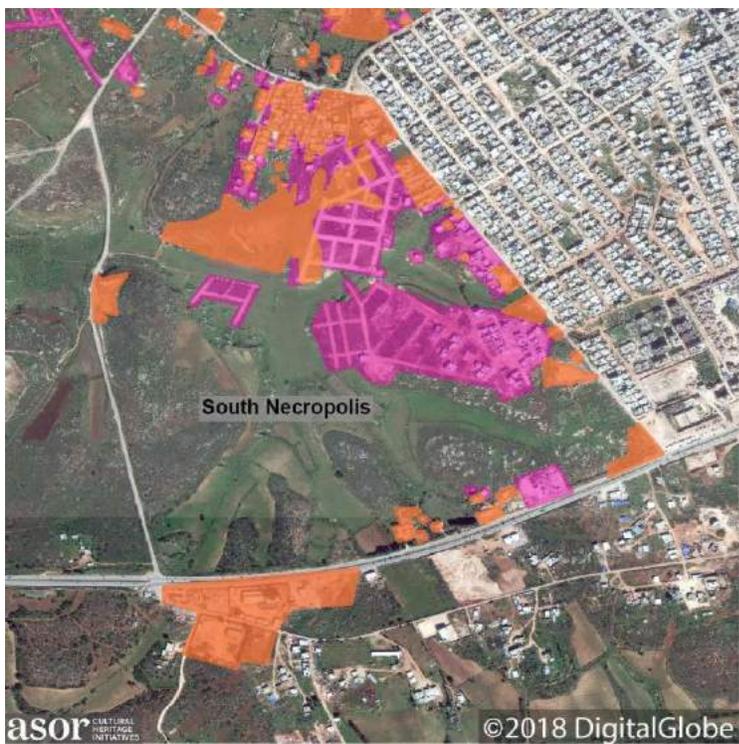

Increased urban development, shown in pink, built over the remains at Wadi Belgadir and compromising other archaeological features in the Southern Temple Precinct, including the Propylaeum (Imagery courtesy of DigitalGlobe; February 12, 2016)

South Necropolis

Another area that has suffered immensely as a result of on-going urban encroachment is the South Necropolis. By November 12, 2012 new subdivisions were being constructed along the northern and northeastern parts of the heritage site. Bulldozing extended almost to the center of the Necropolis. By February 12, 2016 nearly half of the site had been consumed by newly constructed subdivisions. Very little expansion has occurred since 2016, and much of the new construction has taken place within previously bulldozed areas. There was no visible increase in development between November 8, 2017 and April 14, 2018 in the South Necropolis.

Urban development, within the orange areas, on the South Necropolis of Cyrene (Imagery courtesy of DigitalGlobe; November 12, 2012)

Urban development increased dramatically, as shown by the pink areas, onto the South Necropolis by February 12, 2016, damaging much of the northern and eastern parts of the site (Imagery courtesy of DigitalGlobe; February 12, 2016)

Southeast Necropolis

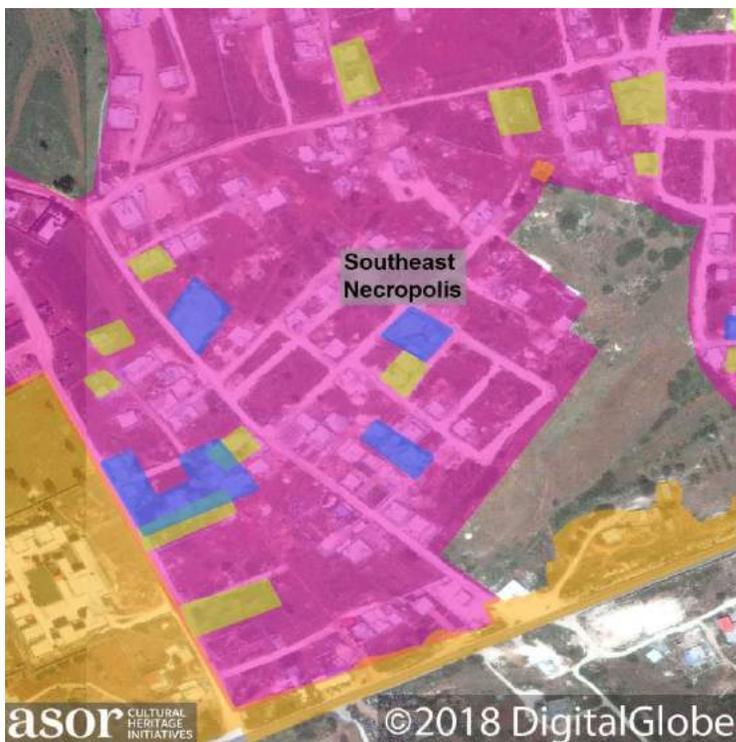

In the earliest image used for analysis, November 12, 2012, there was already visible urban development on the southern and southwestern parts of the Southeast Necropolis. Between November 12, 2012 and February 12, 2016 a large housing development was constructed over the site. Dirt roads and modern buildings were built within the archaeological area. A few new buildings were visible in the November 8, 2017 image. Though the expansion has slowed, there were a small number of new constructions within the development area in the image from April 14, 2018.

Urban development, within the orange areas, as of 2012 on the Southeast Necropolis (Imagery courtesy of DigitalGlobe; November 11, 2012)

Intense increase in urban development onto the Southeast Necropolis, shown in pink (Imagery courtesy of DigitalGlobe; February 12, 2016)

Buildings constructed on the Southeast Necropolis during 2017 are shown in green and those constructed in 2018 are shown in blue (Imagery courtesy of DigitalGlobe; April 14, 2018)

For more information on previous damage to the site of Cyrene, see **ASOR CHI Incident Report LHI 17-0031** in the **October 2017 Monthly Report**; **LHI 17-0029** in the **October 2017 Monthly Report**; **LHI 17-0032** in the **October 2017 Monthly Report**; **LHI 17-0044** in the **December 2017 Monthly Report**; **LHI 17-0045** in the **December 2017 Monthly Report**; **LHI 18-0003** in the **January 2018 Monthly Report**; **LHI 18-0008** in the **February 2018 Monthly Report**; **LHI 18-0017** in the **March 2018 Monthly Report**.

SNHR Vital Facilities Report

On April 9, 2018 the Syrian Network for Human Rights (SNHR) released a vital facilities report for March 2018.⁸⁸ According to SNHR, there were 56 attacks against vital civilian facilities. The sites attacked include four mosques and a museum.

- On March 1, 2018 SARG or Russian warplanes reportedly fired missiles at al-Sulayq Mosque in Duma, Rif Dimashq Governorate, severely damaging the building. **ASOR CHI Incident Report SHI 18-0065**
- On March 12, 2018 SARG warplanes reportedly fired a missile near the National Museum in Idlib, Idlib Governorate, damaging furniture in the museum.
- On March 14, 2018 SARG helicopters reportedly dropped a barrel bomb on al-Mahmoud Mosque in Duma, Rif Dimashq Governorate, severely damaging the building. The mosque was being used as a shelter by locals at the time of the incident. **ASOR CHI Incident Report SHI 18-0075**
- On March 23, 2018 Hayat Tahrir al-Sham (HTS) militants reportedly fired a shell from a tank at a mosque in Makalbis village, Aleppo Governorate, severely damaging the mosque.
- On March 30, 2018 SARG forces reportedly fired rockets near al-Hussein ibn Ali Mosque in the Tariq al-Sadd neighborhood in Daraa, Daraa Governorate, moderately damaging the mosque.
