*Friday, November 20, 2020*

The Kerkenes project ([kerkenesproject.org](http://kerkenesproject.org)), is a robust international collaboration seeking to understand the large Iron Age city located near Sorgun in the province of Yozgat in central Turkey. For the past 28 years, we have undertaken excavations alongside extensive geophysical and geospatial surveys. This report details the results of the 2020 campaign within the context of the long-term project's goals.
